| Electrolysis of, Process and Apparatus for. (P) Blackmore. (xiv, 1895).....                                                                           | 280      |
| Electrolytic Apparatus for Decomposing Metallic. (P) (Kellner and Hallein.) (xiv, 1895).....                                                          | 1047     |
| Electrolytic Decomposition of Alkaline: (P) Castner. (xii, 1893).....                                                                                 | 768      |
| (P) Rosenbaum. (xiv, 1895).....                                                                                                                       | 1048     |
| (P) Sinding-Larsen. (xiii, 1894).....                                                                                                                 | 1206     |
| Electrolytic Production of. (P) Luckow. (xiv, 1895).....                                                                                              | 975      |
| Electrolytic Decomposition of Metallic. (P) Kellner. (xii, 1893), 162, 277: (xiv, 1895).....                                                          | 809      |
| Electrolytical Separation of Bases of. (P) Vautin. (xii, 1894).....                                                                                   | 256      |
| Electrolytically Treating Solutions of. (P) Stormer. (xiii, 1894).....                                                                                | 1067     |
| Extracting and Dissolving Mixtures of. (P) Kusel. (ii, 1883).....                                                                                     | 279      |
| Extraction of Pure Acids from Alkaline. (P) Placet and Bonnet. (xiii, 1894).....                                                                      | 37       |
| Ferrocyanide, Preparation of. (Kassner.) (xiii, 1894).....                                                                                            | 392      |
| Ferrous, Preparation of. (P) Warriek. (xiii, 1894).....                                                                                               | 275      |
| From Brine and Solutions, Means for Recovering. (P) Williams. (xii, 1893).....                                                                        | 43       |
| From Sugar-Beet Molasses, Extraction of Saltpetre from. (vi, 1887).....                                                                               | 639      |
| Facility of Isomorphism. (Le Chatelier.) (xii, 1894).....                                                                                             | 634      |
| Glauber's, Manuf. of, in United States. (Martyn.) (iv, 1885).....                                                                                     | 28       |
| Improving Quality of Alkaline, in Sugar-making. (P) Baix and Possoz. (iv, 1885).....                                                                  | 357      |
| In Lyes, Furnace for Recovering. (P) Dahl. (vi, 1887).....                                                                                            | 442      |
| In Mineral Waters, Recovery of. (P) Boulton. From Kuhn. (ii, 1883).....                                                                               | 281      |
| In Petroleum, Influence of, on its Luminosity. (Alftan.) (vi, 1887).....                                                                              | 650      |
| In Raw Sugar, Estimation of. (viii, 1889).....                                                                                                        | 301      |
| In Soap, Determination of. (Horn.) (vi, 1887).....                                                                                                    | 681      |
| In Solution, Molecular Refractive Powers of. (Dummett.) (ix, 1890).....                                                                               | 766      |
| In Solutions, App. for Concentrating. (P) Croll. (vi, 1887).....                                                                                      | 820      |
| Infl. of Certain, on Nitration. (Pichard.) (iv, 1885).....                                                                                            | 460      |
| Influence of Inorganic, on Rotatory Power of Cane-Sugar. (Farnsteiner.) (x, 1891).....                                                                | 376      |
| Influence of Metallic, on Lactic Fermentation. (Kieck.) (vi, 1892).....                                                                               | 770      |
| Infl. of, on Crystallisation of Sugar. (Nugues.) (xii, 1893).....                                                                                     | 532      |
| Iron, in United States, Manuf. of. (Martyn.) (iv, 1885).....                                                                                          | 28       |
| Iron, Manufacture of. (P) Hart. (xi, 1893).....                                                                                                       | 763      |
| Lead, Manuf. of. (P) Lake. From Tibbits. (xiv, 1895).....                                                                                             | 285      |
| Lead, Production of Basic. (P) Lunge and Maxwell-Lyte. (xiii, 1894).....                                                                              | 734      |
| Manufacture of. (P) Parker and Robinson. (viii, 1889).....                                                                                            | 778      |
| Melting Points of Inorganic. (Meyer and Riddle.) (vii, 1883).....                                                                                     | 1028     |
| Metallic, as Fixing Agents for Diamine Colours. (Kerzetz.) (xiv, 1895).....                                                                           | 268      |
| Metallic, in Germany. (T.R.) (xii, 1893).....                                                                                                         | 963      |
| Mineral, for Bathing and Drinking, Preparation of. (P) Vincent. (xi, 1892).....                                                                       | 1023     |
| Of Acetone, Solubility of, in Dextrose. (Krug and McElroy.) (xii, 1893).....                                                                          | 176      |
| Of Alkaline Bases, Manufacture of. (Heranite and Duboscq.) (xi, 1892).....                                                                            | 1015     |
| Of Alkalis, Action of Alkaline Bases on. (Engel.) (xi, 1892).....                                                                                     | 237      |
| Of Alkalis, Minimum E.M.F. required for Electrolysis of. (Nourisson.) (xii, 1894).....                                                                | 742      |
| Of Alumina, Manufacture of. (P) Augé. (xii, 1889).....                                                                                                | 323      |
| Of Ammonia, Manufacture of: (P) d'Andria. (viii, 1889).....                                                                                           | 284      |
| (P) McGonall. (iv, 1885).....                                                                                                                         | 214      |
| Of Aromatic Hydroxy Compounds, Action of Sulphur on. (Lange.) (vii, 1888).....                                                                        | 341      |
| Of Benzoyl Sulphimide, Production of Etheral. (Fahlberg and List.) (vi, 1887).....                                                                    | 652      |
| Of Brewing Waters. (Glendinning.) (xii, 1893).....                                                                                                    | 124      |
| Of Calcium, Magnesium, &c., Removing, from Aqueous Solutions. (P) Dorems. (viii, 1889).....                                                           | 885      |
| Of Certain Colouring Matters. (P) Petersen-Müller. (xiii, 1894).....                                                                                  | 725      |
| Of Fatty Acids, Behaviour of Alkaline, to Water. (Krafft and Stern.) (xiii, 1894).....                                                                | 1207     |
| Of Iron and Zinc, Precipitation of. (P) Boulton. From Warzee. (xiii, 1894).....                                                                       | 1196     |
| Of Isomeric Oxycarboxylic Acids, Products of Dry Distillation of. (Goldschmidt and Herzog.) (i, 1882).....                                            | 220      |
| Of Mercury and the Halogens, Acid. (Neumann.) (viii, 1889).....                                                                                       | 815      |
| Of Paradiphenyl Carbonic Acid, Production of Acid Derivatives of Alkyl. (P) Newton. From The Farbenfabriken vormals F. Bayer and Co. (xiv, 1895)..... | 769      |
| Of Piperazine, Manufacture of. (P) Wilcox. From The Farbenfabriken vormals F. Bayer and Co. (xii, 1893).....                                          | 463      |

| (P) Greenwood. (xiv, 1895).....                                                                             | 657  |
| (P) Honigman. (i, 1882).....                                                                                | 109  |
| (P) Murray. From La Société Anonyme des Produits Chimiques du Sud-Ouest. (i, 1882). 232; (iii, 1884).....   | 485  |
| (P) Pechiney. (i, 1882).....                                                                                | 108  |
| (P) Ricard. (x, 1891).....                                                                                  | 432  |
| (Schreib.) (v, 1886).....                                                                                   | 533  |
| Production of Ammonia and Apparatus therefor. (P) Capper. From Pick. (vi, 1887).....                        | 368  |
| Production of, and Apparatus therefor. (P) Thompson. (vii, 1888).....                                       | 626  |
| Production of Bicarbonate of:                                                                               |      |
| (P) Babbitt. (ii, 1883).....                                                                                | 41   |
| (Carey, Gaskell, and Hurter.) (i, 1882).....                                                                | 280  |
| (P) Clark. From La Société Anonyme des Produits Chimiques de l'Est. (iii, 1884).....                        | 484  |
| (P) Claus, Sulman, and Berroz. (vii, 1888).....                                                             | 435  |
| (P) Gaskell and Hurter. (ii, 1883).....                                                                     | 177  |
| (P) Potter and Higgin. (ii, 1883).....                                                                      | 415  |
| (P) Société Anonyme des Produits Chimiques du Sud-Ouest. (i, 1882).....                                     | 409  |
| Production of Carbonate of:                                                                                 |      |
| (P) Claus. (vi, 1887).....                                                                                  | 439  |
| (P) Parnell and Simpson. (v, 1886).....                                                                     | 668  |
| (P) Schloesing. (v, 1886).....                                                                              | 166  |
| (P) Wieg. (ii, 1883).....                                                                                   | 246  |
| Prod. of Carbonate of Caustic, and Hydrochloric Acid or Chlorine. (P) Clark. From Daguin. (viii, 1889)..... | 193  |
| Production of Chlorate of. (P) Bottomley and Molesworth. (i, 1882).....                                     | 67   |
| Production of from Potassium Salts. (P) Wise. From The Chemische Fabrik Beckau. (x, 1891).....              | 767  |
| Production of Mono- and Bicarbonate of. (P) Wood. (vii, 1888).....                                          | 438  |
| Production of the World. (Weldon.) (ii, 1883).....                                                          | 2    |
| Production or Treatment of Bicarbonate of. (P) Wise. From Solvay and Co. (xiv, 1895).....                   | 750  |
| Purification of Bicarbonate of. (P) Wood. (vii, 1888).....                                                  | 629  |
| Purification of Carbonate of. (P) Mathieson and Hawliczek. (vi, 1887).....                                  | 290  |
| -Raffinose. (Beythien and Tollens.) (ix, 1890).....                                                         | 310  |
| Recovering from Waste Liquors of Pulp Digesters. (P) Mason and Warren. (ix, 1890).....                      | 408  |
| Recovering from Waste Lyes, and Apparatus therefor. (P) Dawson. (vi, 1887).....                             | 450  |
| Recovery of. (P) Störmer. (i, 1882).....                                                                    | 503  |
| Recovery of from Slags. (P) "The Alkaline Reduction Syndicate" and Cummisham. (ix, 1890).....               | 519  |
| Recovery of, in Manufacture of Wood Pulp. (P) Störmer. (ii, 1883).....                                      | 295  |
| Residue, Manufacture of Sodium Sulphide from. (P) Verein Chemische Fabrik. (ii, 1883).....                  | 280  |
| Russian. (T.R.)..... (viii, 1889). 1621; (xi, 1892).....                                                    | 649  |
| Salicylate of, and Salol in France. (T.R.) (ix, 1895).....                                                  | 850  |
| Salt, Naphthyl-Sulphate. (Steubins.) (i, 1882).....                                                         | 182  |
| Silicate of, Preparation of. (Sehauer-Kestner.) (xi, 1892).....                                             | 748  |
| Solution, Action of Alcoholic, on Albumin, &c. (Fahriou.) (xiv, 1895).....                                  | 1072 |
| Solution, Action of Alcoholic, on Gelatin and Egg Albumin. (Paal and Schilling.) (xiv, 1895).....           | 1072 |
| Solution, Filter for Caustic. (P) Thompson. From Solvay. (v, 1886).....                                     | 421  |
| Test, The Lancashire. (Tate.) (iii, 1884).....                                                              | 63   |
| Titration of. (v, 1886).....                                                                                | 698  |
| Treating Water by Carbonate of. (MacNah and Beckett.) (v, 1886).....                                        | 267  |
| Treatment of Caustic Salts from Manufacture of Caustic. (P) Brock and others. (xiv, 1895).....              | 157  |
| Treatment of Hard Water containing. (Langer.) (xi, 1892).....                                               | 543  |
| Utilising Acid Sulphates of:                                                                                |      |
| (P) Clatfield. (xii, 1894).....                                                                             | 735  |
| (P) Thompson. From Wolf. (vii, 1888).....                                                                   | 640  |
| -Waste, Action of Carbon-Dioxide on. (Kemp.) (iv, 1885).....                                                | 144  |
| -Waste, Analyses, &c. of. (i, 1882).....                                                                    | 266  |
| -Waste, Determination of Alkali in. (Lunge.) (i, 1882).....                                                 | 92   |
| -Waste, Recovery of Sulphur from:                                                                           |      |
| (P) Grouven. (iv, 1885).....                                                                                | 209  |
| (P) Rawes. (iii, 1884).....                                                                                 | 483  |
| -Waste, Treatment of. (P) Ellerhausen. (xi, 1892).....                                                      | 433  |
| -Waste, Utilisation of Ammonia. (x, 1891).....                                                              | 766  |
| -Water, Adulteration of. (xi, 1892).....                                                                    | 172  |
| Works Residues, Treatment of. (P) Miller and Opl. (iii, 1884).....                                          | 373  |
| Sodalite, Formation of. (Friedel.) (ix, 1890).....                                                          | 807  |
| Sodio-Calcium Carbonates. (Reidemeister.) (iii, 1884).....                                                  | 630  |
| Sodium. (Rosenfeld.) (x, 1891).....                                                                         | 863  |
| Acetate, Analysis of Crude. (Neumann.) (vii, 1888).....                                                     | 645  |
| Acetate, Reactions of. (Collischoun.) (xii, 1893).....                                                      | 467  |
| Acetate, Specific Gravity of. (Gerlach.) (v, 1886).....                                                     | 601  |

|                                                                                                                       |            |
|-----------------------------------------------------------------------------------------------------------------------|------------|
| Action of, on Tribenzylamine. (Jackson and Wieg.) (v, 1886).....                                                      | 377        |
| Aluminate. (Stanford.) (v, 1886).....                                                                                 | 219        |
| Alloys of, Some well-defined. (Joannis.) (xi, 1892).....                                                              | 641        |
| Alloys with Lead, Production of. (P) Hetherington and others. (xiv, 1895).....                                        | 280        |
| Aluminate, Analysis of:                                                                                               |            |
| (Bayer.) (ix, 1890).....                                                                                              | 823        |
| (Lunge.) (ix, 1890).....                                                                                              | 766        |
| Aluminate, Determination of, in. (Lunge.) (ix, 1890).....                                                             | 767        |
| Aluminate, Prep. of Carbonated. (P) Lowiz. (i, 1882).....                                                             | 454        |
| Aluminates, Sulphates, and Carbonates, Manufacture of. (P) Claus. (xi, 1892).....                                     | 815        |
| Amide. (Joannis.) (x, 1891).....                                                                                      | 462        |
| And Aluminium Chloride, Manufacture of, and Apparatus. (P) Lake. From de Montgals. (v, 1886).....                     | 608, 608   |
| And Aluminium Fluoride, Manufacture of. (P) Groth. From Gratzel. (iv, 1885).....                                      | 744        |
| And Antimony Double Fluoride. (Kopp and Brunel.) (vii, 1888).....                                                     | 566        |
| And Bisulphite, Hyposulphite of, as Test for Potassium. (Janly.) (vi, 1887).....                                      | 562        |
| And Chlorine Amalgam, Production of. (P) Greenwood. (xii, 1893).....                                                  | 325, 1042  |
| And Iron Double Sulphide, Recovery of Various Matters from. (P) Lunge and Dewar. (xi, 1892).....                      | 433        |
| And Lead, Alloys of. (Greene and Wahl.) (x, 1891).....                                                                | 142        |
| And Lead, Electrolytic Production of Alloy of. (P) Vautin. (xii, 1894).....                                           | 744        |
| And other Alkali Metals, Manufacture of, and Apparatus therefor. (P) Lake. From Netto. (viii, 1889).....              | 122        |
| And Potassium, Apparatus for Manufacture of. (P) Forster. (vii, 1888).....                                            | 712        |
| And Potassium Chloride, Analysis of a Mixture of. (Schütt.) (vii, 1888).....                                          | 770        |
| And Potassium Chloride, Simultaneous Solubility of. (Etard.) (ix, 1890).....                                          | 290        |
| And Potassium Chlorides, Apparatus for Electric Decomposition of Solutions of. (P) Richardson. (xii, 1893).....       | 933        |
| And Potassium, Double Sulphite of. (Hartog.) (viii, 1889).....                                                        | 882        |
| And Potassium, Manufacture of:                                                                                        |            |
| (P) Forster. (viii, 1889).....                                                                                        | 518        |
| (P) Jarvis. (viii, 1889).....                                                                                         | 200        |
| (P) Wallis. (viii, 1889).....                                                                                         | 801        |
| (P) White. (vii, 1888).....                                                                                           | 801        |
| And Potassium Nitrates, Report on. (ix, 1890).....                                                                    | 1036       |
| And Potassium, Production of Metallic. (P) Vautin. (xiv, 1895).....                                                   | 584        |
| And Potassium Sulphides, Treatment of, to obtain H <sub>2</sub> S. (P) Chance. (viii, 1889).....                      | 118        |
| Anisate. (viii, 1889).....                                                                                            | 566        |
| -Antimony Fluoride, Analysis of. (Stein.) (vii, 1888).....                                                            | 133        |
| Arsonate, Manufacture of. (P) Blythe. (iii, 1884).....                                                                | 173        |
| Biborate, Manufacture of. (P) Ascough. (x, 1891). 1066; (xii, 1894). 1197                                             |            |
| Bicarbonate and Carbonate, Manufacture of and Apparatus therefor. (P) Burns. (vi, 1887).....                          | 729        |
| Bicarbonate, Apparatus for Conversion of, into Carbonate. (P) La Société Marchezille Daguin and Co. (xiii, 1894)..... | 518        |
| Bicarbonate, App. for Drying. (P) Jarmay. (xiv, 1895).....                                                            | 26         |
| Bicarbonate, Apparatus for Manufacture of:                                                                            |            |
| (P) Capper. From Pick. (v, 1886).....                                                                                 | 429        |
| (P) Vivian and Bell. (x, 1891).....                                                                                   | 646        |
| Bicarbonate, Calcination of. (P) Solvay. (i, 1882).....                                                               | 26         |
| Bicarbonate in Milk, Estimation of. (Paule.) (viii, 1889).....                                                        | 1013       |
| Bicarbonate of America. (T.R.) (vi, 1887).....                                                                        | 368        |
| Bicarbonate, Preparation of, in United States. (Martyn.) (iv, 1885).....                                              | 28         |
| Bicarbonate, Production and Separation of. (P) Watts and Richards. (vi, 1887).....                                    | 517        |
| Bicarbonate, Production of:                                                                                           |            |
| (P) Brown. (iv, 1885).....                                                                                            | 117        |
| (P) Clancy. (xiv, 1895).....                                                                                          | 482        |
| (P) Gossage and Williamson. (xii, 1893).....                                                                          | 1030, 1030 |
| (P) Murray. From Rotter. (xii, 1893).....                                                                             | 136        |
| (P) Mond and Jarmay. (iv, 1885).....                                                                                  | 282        |
| (P) Wieg. (vii, 1888).....                                                                                            | 502        |
| Bicarbonate, Production of, and Apparatus therefor:                                                                   |            |
| (P) Leith. (x, 1891).....                                                                                             | 463        |
| (P) Solvay. (viii, 1889).....                                                                                         | 45         |
| Bicarbonate, Prod. of Refined. (P) Jarmay. (xiv, 1895).....                                                           | 36         |
| Bicarbonate, Purification of. (P) Gaskell. (iv, 1885).....                                                            | 594        |
| Bicarbonate, Solubility of. (Reich.) (xi, 1892).....                                                                  | 346        |
| Bicarbonate, Testing. (vii, 1888).....                                                                                | 153        |
| Bicarbonate, Treatment of. (P) Bell. (xiii, 1894).....                                                                | 735        |
| Bichromate for Photo Printing. (Husnik.) (xii, 1890).....                                                             | 103        |
| Bichromate of Commerce. (Kissling.) (x, 1891).....                                                                    | 461        |
| Bichromate, Production and Storage of. (P) Gorman. (iv, 1885).....                                                    | 211        |
| Bichromate, Production of:                                                                                            |            |
| (P) Carlile and Park. (iv, 1885).....                                                                                 | 117        |
| (P) Chrystal. (iv, 1885).....                                                                                         | 282        |
| (P) Gorman. (iv, 1885).....                                                                                           | 282, 282   |
| (P) Higgin. (v, 1886).....                                                                                            | 33         |

|-------------------------------------------------------------------------------------------------------|---------------|
| Apparatus for Separating, from Fluids: (P) Birch. (xii, 1893) .....                                   | 460           |
| (P) Danchel. (ix, 1890) .....                                                                         | 377           |
| (P) Muirhead. (viii, 1889) .....                                                                      | 298           |
| (P) O'Brien. (xiv, 1895) .....                                                                        | 495           |
| (P) Sawrey and Collet. (vii, 1888) .....                                                              | 834           |
| (P) Stewart. (xiv, 1895) .....                                                                        | 15            |
| Apparatus for Separating, from Liquids and Gases. (P) Jones. (x, 1891) .....                          | 240           |
| Apparatus for Separating Liquids from: (P) Deacon and Driffield. (x, 1891) .....                      | 239           |
| (P) Welsh and Godman. (xii, 1893) .....                                                               | 134           |
| Apparatus for Treating, by Gases: (P) Melville. (xii, 1893) .....                                     | 1013          |
| (P) Mond. (vii, 1888) .....                                                                           | 833           |
| Concentration and Separation of, Process and Apparatus for. (P) Mays. (xii, 1893) .....               | 435           |
| Method and Apparatus for Separating, from Liquids. (P) Hicks. (viii, 1889) .....                      | 694           |
| Of Different Specific Gravities, Apparatus for Separating. (P) Sharp. (ii, 1883) .....                | 369           |
| Or Fluids Dissolved in Alcohol, &c., Apparatus for Separating. (P) Weitenkamp. (xii, 1893) .....      | 1015          |
| Or Liquids, Machines for Mixing. (P) Smith. (viii, 1889) .....                                        | 379           |
| Propagation of the Explosive Wave in. (Berthelot.) (x, 1891) .....                                    | 384           |
| Separating, from Liquids: (P) Johnson. From Boinholdt and Glatz. (xii, 1893) .....                    | 435           |
| (P) Raleigh. (xiv, 1895) .....                                                                        | 135           |
| Under Pressure, Reactions between. (Spring.) (vii, 1888) .....                                        | 567           |
| Soltsien and Kellner Methods of Removing Bitter Alkaloid from Lapsins. (Kuhn.) (vii, 1889) .....      | 555           |
| Solubility Tests of Mineral Lubricating Oil. (Holde.) (xii, 1894) .....                               | 668           |
| Soluble Glass, Purification of Beet Juice and Molasses by. (P) Schott. (iii, 1884) .....              | 114           |
| See also under Water-Glass and Sodium Silicate.                                                       |               |
| Solution, Abnormal, Instance of. (Parmentier.) (xi, 1892) .....                                       | 780           |
| Adhesive. (P) Saunders and Kerry. (ix, 1890) .....                                                    | 398           |
| Alteration of Conductivity of a. (Holland.) (xii, 1893) .....                                         | 275           |
| And Pseudo-Solution. (Picton and Linder.) (xi, 1892) .....                                            | 64            |
| Estimations in Alkaline. (Jannasch and Niederhofheim.) (xi, 1892) .....                               | 270           |
| For Cleansing Wearing Apparel. (P) Hulme. (ii, 1883) .....                                            | 346           |
| For Determining Hardness of Water. (Tieborne.) (i, 1882) .....                                        | 383           |
| For Preserving Timber, Linen, Cotton, &c. (P) McLea and Punshon. (vii, 1888) .....                    | 841           |
| For Titrating Weldon Muds for Manganese Peroxide. (McKellar.) (vii, 1889) .....                       | 968           |
| For Use in Dyeing Silk. (P) Truman. (xi, 1892) .....                                                  | 680           |
| For Waterproofing Cloth, Felt, Paper, &c. (P) Gaugl and Mossner. (viii, 1889) .....                   | 625           |
| In the Cold, Rapid Method of. (Coleman.) (x, 1891) .....                                              | 231           |
| Law of. (Le Chatelier.) (iv, 1883) .....                                                              | 341           |
| Of Cuprous Chloride as a Developer, Ammoniacal. (vii, 1888) .....                                     | 231           |
| Separation of Matters in, by Osmose, Electrolysis, &c. (P) Marx. (viii, 1889) .....                   | 288           |
| Separation of Metals in Alkaline. (Jannasch and Kammerer.) (xiv, 1895) .....                          | 889           |
| Solutions, Acid and Basic Salts in very Dilute. (Berthelot.) (xi, 1892) .....                         | 464           |
| Acid, Separation of Metals from. (P) Whitehead and Gelschlag. (xiv, 1895) .....                       | 865           |
| Action of Gelatin on Saline. (Mills and Savers.) (xiv, 1895) .....                                    | 252           |
| Albuminous, Preventing Curdling of. (P) Allen. (xi, 1892) .....                                       | 259           |
| Alkaline, Purification of: (P) Cary and others. (i, 1882) .....                                       | 364           |
| (Deacon and Gaskell.) (i, 1882) .....                                                                 | 326           |
| (P) Glover. (iii, 1884) .....                                                                         | 107           |
| Alkaline, Purification of, and Production of Ammonia. (P) Carey, Gaskell, and Hurter. (i, 1882) ..... | 26            |
| Alumina, Separation of Iron from. (Fahlberg.) (i, 1882) .....                                         | 275           |
| Apparatus for Concentrating: (P) Croll. (vi, 1887) .....                                              | 820           |
| (P) Herman. (x, 1891) .....                                                                           | 239           |
| Apparatus for Distilling, &c. (P) Barber. (xii, 1893) .....                                           | 692           |
| Apparatus for Electrolysing Chloride. (P) Hermite and others. (xiv, 1895) .....                       | 492, 810, 810 |
| Apparatus for Evaporating: (P) Chapman. (viii, 1889), 128, 128: (xii, 1893) .....                     | 510           |
| (P) Foster. (x, 1891) .....                                                                           | 653           |
| (P) Fryer. (x, 1891) .....                                                                            | 339           |
| (Grauer.) (vi, 1887) .....                                                                            | 303           |
| (P) Hansen. (ix, 1890) .....                                                                          | 1116          |
| (P) Klamitz. (v, 1886) .....                                                                          | 368           |
| (P) Knoop. (vii, 1888) .....                                                                          | 614           |
| (P) Labrie. (xi, 1892) .....                                                                          | 1019          |
| (P) Morrell. (x, 1891) .....                                                                          | 241           |
| Apparatus for Evaporating Saccharine: (P) Chapman. (ix, 1890) .....                                   | 401           |
| (P) Morrell and Fromherz. (xii, 1894) .....                                                           | 377           |
| App. for Filtering. (P) Newlands and Alliot. (vii, 1889) .....                                        | 128           |
| Apparatus for Separating, from Pulverised Material. (P) Vautin. (vii, 1888) .....                     | 109           |
| Aqueous, of Ammonia, at different Specific Gravities. (Gruneberg.) (viii, 1889) .....                 | 390           |
| Eoliers for Treating Wood, &c., with Acid. (P) Lundberg. (viii, 1889) .....                           | 304           |
| Boiling, by Electric Current. (P) Schuff. (xii, 1893) .....                                           | 1042          |

|                                                                                                                    | PAGE |

| Carrying Salts of Zinc, Preparing. (P) Choate. (xiii, 1894) .....                                                  | 395  |
| Change of Rotation of Tartaric Acid in Mixed. (P) (P) (viii, 1889) .....                                           | 283  |
| Concentrating and Recovering Salts from, Means for. (P) Williams. (xii, 1893) .....                                | 43   |
| Concentrating Method and Apparatus for. (P) Thompson. From Buttnr and Meyer. (iv, 1885) .....                      | 530  |
| Constitution of. (Rüdorff.) (viii, 1889) .....                                                                     | 43   |
| Containing Nickel and Iron, Treating. (P) Johnson. From Parker and Robinson. (xi, 1892) .....                      | 755  |
| Containing Salts, Apparatus for Evaporating. (P) Foster. (x, 1891) .....                                           | 683  |
| Containing Sulphurous Acid or its Salts. (P) McDougall. (viii, 1889) .....                                         | 391  |
| Copper from Cupreous. (P) Price. (iii, 1884) .....                                                                 | 521  |
| Crystallisation of Anhydrous Grape Sugar from Aqueous. (Behr.) (i, 1882) .....                                     | 374  |
| Determination of Acidity of. (de la Harpe.) (iv, 1885) .....                                                       | 510  |
| Dropping Flask for Standard. (Vanderpoel.) (xii, 1894) .....                                                       | 682  |
| Electric Conductivity of Saline. (Chrontschoff.) (viii, 1889) .....                                                | 900  |
| Electric Decomposition of. (P) Hulin. (xiv, 1895) .....                                                            | 584  |
| Electrolysis of Calcium Chloride. (Schoop.) (xiv, 1895) .....                                                      | 864  |
| Electrolysis of Saline. (P) Lénard. (xiii, 1894) .....                                                             | 818  |
| Electrolytical Separation of Bases of Salts from Saline. (P) Vantin. (xiii, 1894) .....                            | 256  |
| Escape of Dissolved Bodies on the Evaporation of. (Marguerite-Delacharlonny.) (vi, 1887) .....                     | 306  |
| Evaporating Saccharine and other. (P) Thompson. From Gillan. (ii, 1883) .....                                      | 388  |
| Evaporating Saline. (P) Bell. (xiii, 1894) .....                                                                   | 731  |
| Evaporation of. (P) Bell. .... (ix, 1890), 67; (xii, 1893), 1011                                                   |      |
| Extraction of Bases from Fermented. (Moren.) (vii, 1888) .....                                                     | 336  |
| For Coating Metals with Lead. (P) Clark. From Horgan. (x, 1891) .....                                              | 704  |
| For Colouring Metals. (Pensky.) (vii, 1888) .....                                                                  | 753  |
| For Toning Photographs. (P) Williams. (xii, 1893) .....                                                            | 948  |
| For Use as Antiseptics, &c., Production of. (P) Kingzett. (vii, 1888) .....                                        | 43   |
| For Waterproofing and Airproofing. (P) Eekstein. (xii, 1893) .....                                                 | 849  |
| Glycerin in Aqueous. Estim. of. (Filsinger.) (vii, 1888) .....                                                     | 350  |
| Heat Conductivity of. (Jaeger.) (x, 1890) .....                                                                    | 488  |
| Hydrostatic App. for Treating. (P) Spence. (xiii, 1894) .....                                                      | 713  |
| Inverting Action of French Official Chloride of Iron. (Herissey.) (xiv, 1895) .....                                | 1053 |
| Means for Transferring Wash. (Voorhees.) (xii, 1893) .....                                                         | 623  |
| Measurement of Concentration of. (Ellinger.) (x, 1891) .....                                                       | 949  |
| Obtaining Metals from their. (P) Sulman. (xiv, 1895) .....                                                         | 870  |
| Of Alkaloids, Vegetable Organisms in. (Soubiran.) (vi, 1887) .....                                                 | 381  |
| Of Ammonia, Specific Gravity of. (Lange and Wiernik.) (viii, 1889) .....                                           | 541  |
| Of Arsenic, Treatment of. (P) McDougall. (xii, 1893) .....                                                         | 156  |
| Of Barium or Strontium Compounds, Treatment of. (P) Gibb. (vii, 1888) .....                                        | 675  |
| Of Neutral Substances in Benzene, Freezing Point of. (Raoult.) (i, 1882) .....                                     | 495  |
| Of Phenols, Aqueous. (P) Helmers. (xiii, 1894) .....                                                               | 900  |
| Of Salts, Apparatus for keeping at Constant Strength. (Foerster.) (ix, 1890) .....                                 | 765  |
| Of Sweet Carbohydrates. (P) Sommer. (xiii, 1894) .....                                                             | 1071 |
| Precipitating Oxide of Tin from. (P) Berton. (xii, 1893) .....                                                     | 762  |
| Precipitation of Tin from Acid. (P) Berton. (xii, 1893) .....                                                      | 762  |
| Preservation of Standard, by Salicylic Acid. (Borntrager.) (vii, 1888) .....                                       | 771  |
| Rate of Loss in Citric Acid. (Watts.) (v, 1886) .....                                                              | 217  |
| Recovering Salts from. (P) Huntley. (xiv, 1895) .....                                                              | 364  |
| Recovery of Chronic Acid from Battery. (P) Fitzgerald. (vi, 1887) .....                                            | 515  |
| Recovery of Gold and Silver from. (P) Kendall. (xiv, 1895) .....                                                   | 871  |
| Removal of Salts of Calcium, Magnesium, &c. from Aqueous. (P) Doremus. (viii, 1889) .....                          | 884  |
| Saccharine, Boiled to Granular State, Treatment of. (P) Mewburn. From Maschinenfab. Grevenbroich. (xi, 1892) ..... | 626  |
| Saccharine, Crystallisation of. (P) Mewburn. From The Maschinenfabrik Grevenbroich. (xi, 1892) .....               | 513  |
| Saccharine, Defecating. (P) Scheibler. (i, 1882) .....                                                             | 513  |
| Saccharine, Filtering. (P) Alexander. From Casatrujor. (ii, 1883) .....                                            | 482  |
| Saccharine, Purifying. (P) Lach and Benies. (xiii, 1891) .....                                                     | 821  |
| Saline, Compressibility of. (Gilbanc.) (xi, 1892) .....                                                            | 780  |
| Saline, Removing Iron from. (Fahlberg.) (i, 1882) .....                                                            | 275  |
| Saline, Separation of Arsenic from. (P) Glaser. (iii, 1884) .....                                                  | 519  |
| Saturated. (P) (P) (xii, 1892) .....                                                                               | 750  |
| Specific Gravities of. (Gerlach.) (v, 1886), 601; (vii, 1888) .....                                                | 521  |
| Specific Heats of. (Mathias.) (vii, 1888) .....                                                                    | 768  |
| Stability of Antiseptic Sublimates. (Meyer.) (vii, 1888) .....                                                     | 131  |
| Stability of Permanganate. (Oddy and Cohen.) (ix, 1890) .....                                                      | 17   |
| Standard. (Buchanan.) (xii, 1894) .....                                                                            | 1093 |
| Standardising Acid. (P) (P) (xiv, 1895) .....                                                                      | 770  |
| Stannous Chloride, Decomposition of. (Donath.) (vi, 1887) .....                                                    | 455  |
| Sugar, Classification of. (v, 1886) .....                                                                          | 169  |
| Sugar, Purification of. (P) (P) (xiv, 1895) .....                                                                  | 876  |
| Sugar, Refining. (P) Scheibler. (ii, 1883) .....                                                                   | 136  |
| Temperature of Steam from Salt. (Sakurai.) (xi, 1892) .....                                                        | 551  |
| Treating, for Producing Dyes. (P) Frost. (ix, 1890) .....                                                          | 167  |

| Coating, with Vitreous Enamels. (P) Biddell. (iv, 1885).....                                    | 746     |
| Coercitive Force of. (Clemandot.) (i, 1882).....                                                | 410     |
| Composition for Coating. (P) Elliott. (xiii, 1894).....                                         | 962     |
| Compounds for Converting Low Grade, into High Grade. (P) Bates. (xii, 1893).....                | 523     |
| Compressed Carbonised, Manufacture of. (P) Inray. From Carey. (xiv, 1895).....                  | 755     |
| Conditions under which Carbon exists in. (Arnold and Read.) (xiii, 1894).....                   | 740     |
| Constants and Coefficients of Elasticity of Nickel. (Mercedier.) (xi, 1892).....                | 166     |
| Conversion of Crude-iron into. (P) Bookwalter. From Robert. (vii, 1888).....                    | 504     |
| Conversion or Purification of. (P) Boulton. From Kone-man, Singer, and Hatch. (xiii, 1894)..... | 42      |
| Converter Linings and Bottoms. (P) Tucker. (vi, 1887).....                                      | 43, 512 |
| Converting Cast-Iron into: (P) Bond and Whiteley. (ii, 1883).....                               | 330     |
| (P) Hufty and Caldwell. (xiv, 1895).....                                                        | 581     |
| (Lebedieff.) (xi, 1892).....                                                                    | 245     |
| Converting Iron into: (P) Hodge. (x, 1891).....                                                 | 645     |
| (P) Lake. From Hardmeyer and others. (vii, 1888).....                                           | 634     |
| Converting Iron Plates into. (P) Zohrab. (xiv, 1895).....                                       | 161     |
| Copper in, Estimation of. (Reinhardt.) (viii, 1889).....                                        | 572     |
| Coppering with Alkaline-organic Solutions of Copper. (Weil.) (i, 1882).....                     | 234     |
| Crucible, Manufacture of. (Muller.)..... (iv, 1885), 676; (vi, 1887).....                       | 293     |
| Crystallised Compounds in Cement. (Bekrens and Van Linde.) (xiv, 1895).....                     | 274     |
| Crystals contained in a Bar of Swedish. (Stoltzer.) (ii, 1883).....                             | 262     |
| Dephosphorisation of, in Germany. (Braun.) (i, 1882).....                                       | 71      |
| Desulphurising. (Saniter.) (xii, 1893).....                                                     | 692     |
| Direct from Ore, Production of. (T.R.) (vi, 1887).....                                          | 755     |
| Direct Preparation of. (P) Justice. (i, 1882).....                                              | 192     |
| Distinguishing Iron from. (Sévoz.) (iv, 1885).....                                              | 138     |
| Effect of Arsenic on. (Stead.) (xiv, 1895).....                                                 | 579     |
| Effect of Rolling and Wire Drawing upon Mild. (Allen.) (viii, 1889).....                        | 51      |
| Elasticity of, Variation in. (iv, 1885).....                                                    | 600     |
| Electro Fusion of. (P) Thwaite. (xiii, 1894).....                                               | 528     |
| Elimination of Sulphur from Molten. (P) Phillips. (xiii, 1894).....                             | 42      |
| Elimination of Sulphur or Phosphorus from Molten. (P) Phillips. (xii, 1893).....                | 932     |
| Emmerton's Method of Determination of Phosphorus in. (Babbitt.) (xii, 1893).....                | 627     |
| Extracting, from Ores. (P) Lebedieff. (x, 1891).....                                            | 838     |
| For Corsets, Substitute for. (P) Royle. (iv, 1885).....                                         | 537     |
| For Rails, Experiments on. (Gruener.) (i, 1882).....                                            | 111     |
| For Rails, Quality of. (Gruener.) (i, 1882).....                                                | 151     |
| Founding. (P) McRoberts. (xiii, 1894).....                                                      | 615     |
| From Inferior Wrought Iron. (P) Sheehan. (iii, 1884).....                                       | 180     |
| From Oxidised Pyrites, Manufacture of. (P) Whiteman. From Martin. (i, 1882).....                | 192     |
| Furnaces, Basic Linings for Open Hearth. (P) Batlo. (iv, 1885).....                             | 214     |
| Furnaces for Making Malleable. (P) Burch and Allen. (iv, 1885).....                             | 213     |

| Influence of Addition of, on the Solidity of Cement. (Hanky.) (vi, 1887).....                          | 140  |
| Influence of Cane, on Valuation of Malts and Worts. (Prior.) (xiii, 1894).....                         | 1080 |
| Influence of Inactive Substances on Determination of Grapes. (Fribman.) (vii, 1888).....               | 594  |
| Influence of Inorganic Salts on Rotatory Power of Cane. (Farnsteiner.) (x, 1891).....                  | 376  |

## Sugar—cont.

|                                                                                                              | PAGE     |
|--------------------------------------------------------------------------------------------------------------|----------|
| Influence of Inversion upon Fermentation of Cane. (Bauer.) (i, 1882).....                                    | 330      |
| Influence of Invert, on Formation of Molasses. (Prinsen-Geerlings.) (xiv, 1895).....                         | 667      |
| Influence of Lead Acetate on Cupric Reducing Power of Invert. (Borntrager.) (xiii, 1894).....                | 1230     |
| Influence of Lead Acetate on Estimation of Invert. (Borntrager.) (xiv, 1895).....                            | 896      |
| Influence of, on Cements. (Stammer.) (viii, 1889).....                                                       | 545      |
| Influence of Percentage of Fat in Beetroot Seed on Richness of Beets in. (Doerstling.) (xiii, 1894).....     | 410      |
| Influence of Volume of Lead Acetate Precipitate in Titration of. (Borntrager.) (xiii, 1894).....             | 1230     |
| Inversion of, by Glycerin. (Boritz.) (xiii, 1894).....                                                       | 1211     |
| Inversion of Cane, by Invertase. (Thompson.) (ix, 1890).....                                                 | 309      |
| Inversion of Cane, in Acid Syrups. (Hershey.) (xiv, 1895).....                                               | 606      |
| Invert. (Jungfleisch and Grimbirt.) (viii, 1889).....                                                        | 295      |
| Invert, Detection of. (vii, 1888).....                                                                       | 527      |
| Invert, Detection of, by Methylene Blue. (vii, 1888).....                                                    | 591      |
| Invert, Determination of. (v, 1886).....                                                                     | 547      |
| (Weichmann.) (x, 1891).....                                                                                  | 955      |
| Invert, Determination of Amount of Inversion in. (Lovibond.) (vii, 1888).....                                | 831      |
| Invert, Estimation of. (viii, 1889).....                                                                     | 1014     |
| (Press.) (vii, 1888).....                                                                                    | 76       |
| (Striegler.) (xi, 1892).....                                                                                 | 1038     |
| Invert, Estimation of, in Factory Products. (viii, 1889).....                                                | 1014     |
| Invert, Estimation of Small Quantities of. (Baumann.) (xii, 1893).....                                       | 457      |
| Invert, in Cane Juices. (Schweitzer.) (ix, 1890).....                                                        | 878      |
| Isolation of Crystallisable Cane, from Maize. (Washburn and Tollens.) (ix, 1890).....                        | 748      |
| Juice, Apparatus for Concentrating:                                                                          |          |
| (P) Deacon. From Maxwell. (xi, 1892).....                                                                    | 830      |
| (P) Raeynackers. (ix, 1890).....                                                                             | 878      |
| Juice, Apparatus for Cooling. (P) Wise. From D'Abbadie de Barrau. (xii, 1893).....                           | 458      |
| Juice, Apparatus for Treating. (P) Pitt. From Tracey. (ix, 1890).....                                        | 878      |
| Juice, Centrifugal Machines for Extracting. (P) Mewburn. (xi, 1892).....                                     | 931      |
| Juice Clarifiers. (P) Fletcher. (iii, 1884).....                                                             | 645      |
| Juice, Continuous Saturation of. (Reboux.) (xiii, 1894).....                                                 | 749      |
| Juice, Decolorisation and Purification of. (Englert and Becker.) (vi, 1887).....                             | 47       |
| Juice, Defecation of Cane. (P) Leigh. From Fry. (x, 1891).....                                               | 781      |
| Juice, Determination of the Density of. (ix, 1890).....                                                      | 657      |
| Juice, Extracting, from Canes, Roots, &c. (P) Berry. (xiv, 1895).....                                        | 762      |
| Juice, Extraction of Cane. (P) Boomer. (ii, 1883).....                                                       | 290      |
| Juice, Filtration of Cane, during Evaporation. (Philippe.) (xiv, 1895).....                                  | 375      |
| Juice, Filtration of Diffusion, after Heating. (xiii, 1894).....                                             | 749      |
| Juice, Filtration of Saturated. (Bonvier.) (xii, 1893).....                                                  | 776      |
| Juice, Multiple Effect Evaporating Apparatus for. (P) Maxwell. (ix, 1890).....                               | 794      |
| Juice, Precipitates obtained in Evaporating. (Storey.) (xii, 1894).....                                      | 750      |
| Juice, Purification of Cane, with Baryta. (Du Beaufret.) (xiv, 1895).....                                    | 47       |
| Juice, Purification of Diffusion. (Liedke.) (xiii, 1894).....                                                | 749      |
| Juice, Purification of, in Triple-Effect Apparatus. (Mittlemann.) (xiii, 1894).....                          | 166      |
| Juice, Refining. (P) Schneller and Wisse. (xi, 1892).....                                                    | 830      |
| Juice, Treatment of Cane. (P) Leigh. From Cambray. (xiii, 1894).....                                         | 1211     |
| Juice, Treatment of, with Baryta and Sulphurous Acid. (Dupont.) (xiv, 1895).....                             | 497      |
| Juices, Apparatus for Defecating and Evaporating. (P) Corders. (x, 1891).....                                | 843      |
| Juices, Filtering Substance for. (P) Thompson. (vii, 1888).....                                              | 580      |
| Juices, Filters for. (P) Abel. From Perret. (iii, 1884).....                                                 | 375      |
| Juices, Purification of, by Electricity. (P) Inury. From La Societe Anonyme Raffinerie Say. (xiv, 1895)..... | 816      |
| Juices, Purifying. (P) Lach and Benies. (xii, 1894).....                                                     | 824      |
| Juices, Purifying and Decolorising. (P) Steffen. (xii, 1894).....                                            | 1211     |
| Juices, Use of Asbestos for Filtration of. (Maignen.) (xiii, 1894).....                                      | 264      |
| Juices, Use of Strontium Chloride for Purifying. (P) Kollmann. (i, 1882).....                                | 415      |
| Law of Germany, New. (T.R.) (vi, 1887).....                                                                  | 569      |
| Legislation in France. (T.R.) (x, 1891).....                                                                 | 392      |
| Lime, Apparatus for Extraction of. (P) Konig. (ii, 1883).....                                                | 235      |

| Extracting Juices from, and Apparatus therefor. (P) Perret. (vi, 1887) .....            | 375                                 |
| Extraction of. (vi, 1887) .....                                                         | 296                                 |
| Juice, Alcoholic Fermentation of. (Marentco.) (viii, 1889) .....                        | 561                                 |
| Juice, App. for Evaporating. (P) Labrie. (vi, 1887) .....                               | 554                                 |
| Juice, Apparatus for Extracting. (P) Stewart. (xi, 1892) .....                          | 930                                 |
| Juice, Citric Acid in. (Shorey.) (xiv, 1895) .....                                      | 51                                  |
| Juice, Eliminator and Filter for. (P) Ewing. (v, 1886) .....                            | 674                                 |
| Juice, Evaporation of, and Apparatus therefor. (P) Fletcher. (vii, 1888) .....          | 686                                 |
| Juice from the Nodes and Internodes of. (Beeson.) (xiv, 1895) .....                     | 1053                                |
| Juice in. Percentage of. (Spencer.) (v, 1886) .....                                     | 458                                 |
| Juice, Manufacture of Sugar from. (Brear.) (i, 1882) .....                              | 376                                 |
| Juice, Purification of, in Louisiana. (Kirchoff and Thiele.) (xiv, 1895) .....          | 978                                 |
| Juice, Settling Apparatus for. (P) Smith. From Kidd. (xii, 1893) .....                  | 940                                 |
| Knife for Slicing. (P) Bergreen. (x, 1891) .....                                        | 151                                 |
| Paper from. (T.R.) .....                                                                | (viii, 1889), 315; (xii, 1893), 298 |
| Quality of the Flowering. (Prinsen Geerlings.) (xiv, 1895) .....                        | 374                                 |
| Quality of the Spirit Obtained from, in Guayaquil. (Monheim.) (ix, 1890) .....          | 754                                 |
| Trash, Apparatus for Drying. (P) Boulton. From Bon. (ix, 1890) .....                    | 1054                                |
| Suint, Apparatus for Extracting, from Wool. (P) Richard-Lagerie. (xiii, 1894) .....     | 962                                 |
| Extracting, from Wool. (P) Urquhart. From Richard-Lagerie. (xii, 1893) .....            | 1044                                |
| Glycollic and Propylenediacarbonic Acids in. (Buisine.) (viii, 1888) .....              | 55                                  |
| Manufacture of Potassium Salts from. (Bott.) (ii, 1883) .....                           | 123                                 |
| Production of Neutral Wool Grease from. (P) Lahusen. (xii, 1893) .....                  | 772                                 |
| Recovery of, from Wool Grease. (P) Mills. (xii, 1893) .....                             | 772                                 |
| Separating and Purifying. (P) Braun. (ii, 1883) .....                                   | 350                                 |
| Volatile Organic Acids in. (Buisine.) (vii, 1888) .....                                 | 219                                 |
| Waters, Changes in. (Buisine.) (vi, 1887) .....                                         | 221                                 |
| Sulfonal, Detection of. (vii, 1888) .....                                               | 772                                 |
| Tariff Classification of, in Italy. (T.R.) (vii, 1888) .....                            | 873                                 |
| Sulphamidobenzoic Acid, Production of <i>o</i> -. (Fahlberg and List.) (vi, 1887) ..... | 652                                 |
| Sulphate, Desulphurisation of Sodae. (P) Pedder. (xiv, 1895) .....                      | 271                                 |
| Explosion of Tube containing Chromous. (Van Bemmelen.) (vi, 1887) .....                 | 661                                 |
| Extraction of Sulphur from Earthy. (P) Rawes. (i, 1882) .....                           | 454                                 |
| Of Alumina. <i>See under</i> Aluminium Sulphate.                                        |                                     |
| Of Ammonia. <i>See under</i> Ammonium Sulphate.                                         |                                     |
| Sulphates, Action of Aluminium on. (Rossel and Frank.) (xiii, 1894) .....               | 515                                 |
| Action of Carbon on Alkali. (Scheurer-Kestner.) (xi, 1892) .....                        | 748                                 |
| Action of Ferric Oxide on, at a High Temperature. (Scheurer-Kestner.) (ix, 1885) .....  | 281                                 |
| Action of Sulphuric Acid on. (Jeremini.) (vii, 1888) .....                              | 844                                 |

Sulphates—*cont.*

|                                                                                                                    |      |
|--------------------------------------------------------------------------------------------------------------------|------|
| Affinity of Hydrated, for Sulphuric Acid. (Fink.) (vi, 1887) .....                                                 | 728  |
| Alkali Phosphates from Neutral or Acid Alkali, Obtaining. (P) Wetter. From Albert. (xii, 1893) .....               | 43   |
| Alkali Silicates, &c., from, Obtaining, and Apparatus therefor. (P) Thompson. From Weeren. (v, 1886) .....         | 33   |
| And Acids, Utilising Acid. (P) Campbell and Walker. (xiv, 1895) .....                                              | 482  |
| Antiseptic Value of. (Kingzett.) (vi, 1887) .....                                                                  | 702  |
| Basic. (Habermann.) (iii, 1884) .....                                                                              | 172  |
| Comparative Antiseptic Values of. (Kingzett.) (vii, 1888) .....                                                    | 714  |
| Conversion of Sulphides into. (Sommer.) (iii, 1884) .....                                                          | 23   |
| Furnace for Production of. (P) Mackenzie. (ii, 1883) .....                                                         | 477  |
| Manufacture of Metallic:                                                                                           |      |
| (P) Hartley and Bleakinsop. (vii, 1888) .....                                                                      | 435  |
| (P) Newton. From O'Brien. (viii, 1889) .....                                                                       | 707  |
| Metallurgy of Metallic. (P) Mills. (xiii, 1894) .....                                                              | 741  |
| Of Alkalies, Manufacture of. (P) Condy. (v, 1886) .....                                                            | 324  |
| Of Metals, Obtaining, from their Oxides. (P) Graham. (vi, 1887) .....                                              | 217  |
| Preparation of Chlorides from. (P) Lach. (i, 1882) .....                                                           | 149  |
| Producing Metal, as By-products, and Carbonizing Hydrogen Gas. (P) Hawkins. (xiv, 1895) .....                      | 793  |
| Production of Acid. (P) Giles and others. (x, 1891) .....                                                          | 767  |
| Production of Alkali, by Electrolysis. (P) Parker and Robinson. (xii, 1893) .....                                  | 276  |
| Reduction of Alkali, by Hydrogen and Carbon. (Berthelot.) (ix, 1890) .....                                         | 1035 |
| Sulphides in. Detection of. (Villiers.) (vi, 1887) .....                                                           | 607  |
| Sulphuric Acid and Hydrochloric Acid for Decomposition of. (P) Pedder. (xi, 1892) .....                            | 815  |
| Sulphuric Acid in, Estimation of:                                                                                  |      |
| (Absolut.) (xi, 1892) .....                                                                                        | 711  |
| (Stolle.) (xi, 1892) .....                                                                                         | 711  |
| Utilising Acid. (P) Darling. (xiv, 1895) .....                                                                     | 866  |
| Volumetric Determination of. (Quantin.) (viii, 1889) .....                                                         | 216  |
| <i>See also under</i> Pyrosulphates.                                                                               |      |
| Sulphide Minerals, Formation of. (Chuard.) (xi, 1892) .....                                                        | 274  |
| Ores, Treatment of Complex. (P) Ingalls and Wyatt. (xii, 1893) .....                                               | 767  |
| Solutions, Constitution of some. (Picton.) (xi, 1892) .....                                                        | 64   |
| Sulphides, Action of Alkaline, in Cyanide Solutions. (xiv, 1895) .....                                             | 662  |
| Action of Electric Current on Metallic. (Garnier.) (xiv, 1895) .....                                               | 491  |
| Action of Nitrates on. (Lunze.) (iii, 1884) .....                                                                  | 287  |
| Action of Nitrates on Alkaline. (Parnell.) (i, 1882), 133; (iii, 1884) .....                                       | 138  |
| Alkaline, Physiological Action of. (Pohl.) (vi, 1887) .....                                                        | 514  |
| Alkaline, Production of. (P) Weldon. From Helbig. (ii, 1883) .....                                                 | 90   |
| Analysis of:                                                                                                       |      |
| (Jannasch and Wasowicz.) (xi, 1892) .....                                                                          | 457  |
| (Weil.) (vi, 1887) .....                                                                                           | 594  |
| And Sulphydrates of Alkaline Earths, Utilisation of. (P) Loesner. (xiv, 1895) .....                                | 1043 |
| Aromatic, Production of. (Ziegler.) (ix, 1890) .....                                                               | 1026 |
| As Insecticides, Alkaline. (Dubois.) (x, 1891) .....                                                               | 842  |
| Asheroff Process for Treating Zinc-Lead. (xiv, 1895) .....                                                         | 774  |
| Chlorinated Ethyl, Physiological Action of. (Meyer.) (vi, 1887) .....                                              | 674  |
| Conversion of, into Sulphates. (Sommer.) (iii, 1884) .....                                                         | 23   |
| Extraction of Metals from. (P) Vautio. (xiv, 1895) .....                                                           | 582  |
| Extraction of Zinc from Zinc-Lead. (xiv, 1895) .....                                                               | 867  |

| Action of, on Organic Compounds. (Ziegler.) (ix, 1890).....                                                             | 1926 | Dioxide, Decomposition of, by Carbon. (Scheurer-Kestner.) (xi, 1892).....                                            | 687      |
| Action of, on Salts of Aromatic Hydroxy Compounds. (Lange.) (vii, 1888).....                                            | 341  | Dioxide, Vessels for Containing: (P) Boake and Roberts. (xii, 1893).....                                             | 833      |
| Action of, on the Toluidines. (Gattermann.) (viii, 1889).....                                                           | 275  | (P) Sox. (xiii, 1894).....                                                                                           | 271      |
| Action of, on Water. (Boehm.) (i, 1882).....                                                                            | 264  | Dioxide with Phenol, Compound of. (Wolzer.) (i, 1882).....                                                           | 398      |
| Action of, on Wine. (Nessler.) (ix, 1885).....                                                                          | 414  | Electrolytic Decomposition of Compounds of Metals and. (P) Abel and Imray. From Siemens and Halske. (xii, 1893)..... | 847      |
| Action of Reducing Agents on. (Trautmann.) (x, 1891).....                                                               | 730  | Elimination of, from Iron: (Ball and Winzhan.) (xi, 1892).....                                                       | 751      |
| Action of Sulphurous Acid on Flowers of. (Colefax.) (xi, 1892).....                                                     | 36   | (Massenez.) (x, 1891).....                                                                                           | 1009     |
| And Alkali Process, The Parnell and Simpson. (Parnell.) (viii, 1889).....                                               | 11   | (Suniter.) (xii, 1893).....                                                                                          | 544      |
| And Petroleum, Occurrence of, in the Caucasus. (vii, 1888).....                                                         | 202  | (Stead.) (xii, 1893).....                                                                                            | 1092     |
| And Phosphorus, Combination of, in Plants, Soils, &c. (Berthelot and Andre.) (vii, 1888).....                           | 292  | Elimination of, from Molten Iron or Steel. (P) Phillips. (xi, 1893), 332; (xiii, 1894).....                          | 465      |
| Apparatus for Estimation of, in Iron. (Blum.) (xii, 1893).....                                                          | 63   | Eschka's Method of Estim. (Hundeshagen.) (xii, 1893).....                                                            | 402      |
| Apparatus for Extracting and Subliming. (P) Johnson. From Dubois. (vi, 1887).....                                       | 439  | Estimation of. (Treudwell.) (x, 1891).....                                                                           | 951      |
| Apparatus for Extracting, from Pyrites. (P) Henderson. From Leblais. (iv, 1885).....                                    | 497  | Estimation of, by Weil's Method. (Friedheim.) (vi, 1887).....                                                        | 607      |
| Apparatus for Extraction of. (P) Boul. From Boulet and others. (x, 1891).....                                           | 683  | Estimation of, Methods for. (Marchlewski.) (xii, 1893).....                                                          | 283      |
| Apparatus for Manufacture of Colours containing. (P) Majert. (iv, 1885).....                                            | 275  | Exports from Italy. (T.R.) (ix, 1890).....                                                                           | 830      |
| Apparatus for Obtaining, from Ores. (P) Francis and Jones. (vi, 1887).....                                              | 731  | Exports from Sicily. (T.R.) (viii, 1889), 312; (xii, 1893).....                                                      | 189      |
| Apparatus for Separating from Sulphuretted Hydrogen: (P) Simpson and Parnell. (vi, 1887).....                           | 729  | Exports from Japan. (T.R.) (ix, 1890).....                                                                           | 776      |
| (P) Worsley. (ii, 1883).....                                                                                            | 477  | Exports of Japan for 1885-86. (T.R.) (vi, 1887).....                                                                 | 615      |
| Arsenic in, Estimation of Small Quantities of. (Schaeppi.) (i, 1882).....                                               | 118  | Extraction of, from Alkali Waste. (P) Rawes. (i, 1882).....                                                          | 454      |
| Attempts to Combine, with Sulphur. (Prinz.) (iii, 1884).....                                                            | 444  | Extraction of, from Minerals. (P) Adam and Thomson. (ii, 1883).....                                                  | 542      |
| Burning of, for Disinfecting Purposes. (P) Lake. (xiii, 1894).....                                                      | 657  | Formation of Sulphuric Anhydride in Burning. (Lunge.) (ii, 1883).....                                                | 177      |
| Candles. (P) Mores and Bourne. (xi, 1892).....                                                                          | 174  | From Alkali Waste, Reclamation of. (Op.) (i, 1882).....                                                              | 452      |
| Candles and Fumigators. (P) Künzert. (xiii, 1894).....                                                                  | 833  | From Black Ash and Apparatus therefor, Obtaining. (P) Hargreaves and Robinson. (ix, 1890).....                       | 500      |
| Candles and Holders. (P) Künzert. (xiii, 1894).....                                                                     | 657  | From Furnace Gases. (P) Hanisch and Schroeder. (ix, 1890).....                                                       | 487      |
| Carbide, Production of. (Mühlhauser.) (xii, 1894).....                                                                  | 35   | From Sulphuretted Hydrogen: (P) Clauss. (ii, 1883).....                                                              | 414      |
| Chloride. (Fawcitt.) (v, 1889).....                                                                                     | 638  | (P) Reimer. From von Miller and Opl. (iv, 1885).....                                                                 | 117      |
| Chloride, Action of, on Oils. (Fawcitt.) (vii, 1888).....                                                               | 552  | Furnaces for Burning. (P) Fish. (x, 1891).....                                                                       | 769      |
| Chloride, Manufacture of Compounds of, with Fats, &c. (P) Sommer. (vii, 1888).....                                      | 853  | Furnaces for Extracting. (P) Black and Larkin. (ii, 1882).....                                                       | 232      |
| Chloride, Use of, in Vulcanisation of India-rubber. (Fawcitt.) (viii, 1889).....                                        | 368  | Gathering, from Volcano Fiss. (T.R.) (viii, 1889).....                                                               | 585      |
| Combination of Producers of, by Chance Process. (T.R.) (ix, 1890).....                                                  | 337  | Imports into the United States. (T.R.) (xi, 1892).....                                                               | 75       |
| Compound in Cotton-Seed Oil. (Dupont.) (xiv, 1895).....                                                                 | 811  | In Albuminoids, Determination of. (Kochs.) (vi, 1887).....                                                           | 148      |
| Compounds. (Gauthier.) (iii, 1884).....                                                                                 | 413  | In Aniline and <i>p</i> -Aminophenol. (Hantzsch and Freese.) (xiv, 1895).....                                        | 398      |
| Compounds Accompanying Aniline Bases. (Hantsch and Freese.) (xiii, 1894).....                                           | 1189 | In Blast-Furnace Slag. (Elberts.) (xiv, 1895).....                                                                   | 276      |
| Compounds, Analysis of Volatile Organic. (Meyer and Stadler.) (iii, 1884).....                                          | 455  | In Burnt Ore, Estimation of. (Lunge.) (viii, 1889).....                                                              | 572      |
| Compounds, App. for Oxidising. (P) Truchelut. (vii, 1888).....                                                          | 862  | In Burnt Pyrite, Estimation of. (Watson.) (vii, 1888).....                                                           | 395      |
| Compounds, Constitution of Primuline and Alhed. (Green.) (viii, 1889).....                                              | 383  | In Burnt Sulphur Ores, Determination of. (Keller and Maus.) (xiv, 1895).....                                         | 822      |
| Compounds, Extraction of, from Alkali Waste. (P) Simpson. (iii, 1884).....                                              | 259  | In Cast Iron: (Keep.) (xiii, 1894).....                                                                              | 524      |
| Compounds in Coal Gas, Influence of Distillation Temperature on. (Wright.) (vii, 1888).....                             | 61   | (Turner.) (vii, 1888).....                                                                                           | 569      |
|                                                                                                                         |      | In Coal. (Helms.) (i, 1882).....                                                                                     | 219      |
|                                                                                                                         |      | In Coal, Action of, on Earthenware. (ix, 1890).....                                                                  | 806      |
|                                                                                                                         |      | In Coal, &c., Estimation of. (Hempel.) (xii, 1893).....                                                              | 181      |

| Action of, on Aluminium:                                                                                                          |          | (P) Negrier. (x, 1891).....                                                                            | 639       |
| (Ditte.) (ix, 1890).....                                                                                                          | 549      | (P) Veitch. (viii, 1889).....                                                                          | 983       |
| (Le Roy.) (xi, 1892).....                                                                                                         | 165, 918 | Concentration of, in an Iron Pan. (P) Grindley. (ii, 1885).....                                        | 41        |
| Action of, on Benzene Hydrocarbons. (Lunge and Barbezat.) (ii, 1883).....                                                         | 166      | Concentration of, in Apparatus of Cast-iron and Platinum. (Scheurer-Kestner.) (xi, 1892).....          | 740       |
| Action of, on Citrene. (Bouchardat and Lafont.) (xii, 1893).....                                                                  | 372      | Concentration of, in Glass Retorts. (Luty.) (xii, 1893).....                                           | 153       |
| Action of, on Concentrated, upon Benzene. (Lunge.) (ii, 1883).....                                                                | 166      | Concentration of, in Gold Lined Platinum Stills. (Lunge.) (xi, 1892).....                              | 522       |
| Action of, on Diethylnaphthylamine at High Temperatures. (Smith.) (i, 1882).....                                                  | 319      | Concentration of, in Lead Vessels. (P) Wolters. (xiii, 1894).....                                      | 887       |
| Action of, on Durene. (Jacobsen.) (v, 1886).....                                                                                  | 375      | Concentration of, Processes for. (Gerber.) (xiii, 1894).....                                           | 36        |
| Action of, on Ferrous and Aluminium Sulphates. (Jeremin.) (vii, 1888).....                                                        | 841      | Consumption of Coal in Kessler Process of Concentration of. (Kessler.) (xiv, 1895).....                | 1645      |
| Action of, on Lead. (Lunge.) (xii, 1893).....                                                                                     | 146      | Decomposing Bone Earth with. (Stolba.) (vii, 1888).....                                                | 333       |
| Action of, on Metallic Copper. (Schuster.) (xiii, 1894).....                                                                      | 957      | Decomp. of Sodium Nitrate by. (Volney.) (xi, 1892).....                                                | 347       |
| Action of, on Oleic Acid. (Szabanejev.) (v, 1886).....                                                                            | 452      | Decomposition of Sodium Thiosulphate by. (Vaubel.) (vii, 1889).....                                    | 704       |
| Action of, on Oleic Acid and its Triglyceride. (Geitel.) (vii, 1888).....                                                         | 218      | Determination of Ash in Sugar by. (Danyasz.) (vii, 1888).....                                          | 348       |
| Action of, on Ozokerite. (Zafiezicki.) (vi, 1887).....                                                                            | 652      | Determination of Combined. (Andrews.) (ix, 1890).....                                                  | 328       |
| Action of, on Protocatechuic Acid. (Nolting and Bourcart.) (i, 1882).....                                                         | 340      | Disinfection of Town Sewage with. (Ivanoff.) (xii, 1894).....                                          | 537       |
| Action of, on Pyrocatechol and Homopyrocatechol. (Consin.) (xiii, 1894).....                                                      | 60       | Dynamic Theory of Manuf. of. (Hurter.) (i, 1882).....                                                  | 8, 49, 83 |
| Action of, on Quinol. (Stebbins.) (x, 1891).....                                                                                  | 854      | Electrical Heat for Concentrating. (Haussemann and Niethammer.) (xii, 1891).....                       | 391       |
| Action of, on Tribromophenol. (Georgescu.) (ix, 1890).....                                                                        | 731      | Electrolytic Production of. (P) Elmore and Barrett. (vi, 1887).....                                    | 140       |
| Action of, on Zinc on Dilute. (Pullinger.) (ix, 1890).....                                                                        | 946      | Estimation of:                                                                                         |           |
| Affinity of Hydrated Sulphates for. (Fink.) (vi, 1887).....                                                                       | 728      | (Jannasch and Richards.) (viii, 1889).....                                                             | 819       |
| And Alkali Trade of England. (Lunge.) (iii, 1884).....                                                                            | 479      | (Windisch.) (xii, 1894).....                                                                           | 905       |
| And Bichromate of Potash as a Mordant for Wool. (Liechti and Hummel.) (xii, 1893).....                                            | 241      | Estimation of Fuming. (Lunge.) (xiv, 1895).....                                                        | 821       |
| And Hydrochloric Acid for Decomposition of Chlorides. (P) Pedder. (xi, 1892).....                                                 | 815      | Ethers, Production of. (P) Newton, From The Farben-fabriken vormals F. Bayer and Co. (xiii, 1894)..... | 60        |
| And its Salts, Purification of. (P) Meckle. (iv, 1883).....                                                                       | 345      | Evaporating Pans for. (P) McDougall. (xiv, 1895).....                                                  | 158       |
| And Manganate of Soda Contracts. (T.R.) (ix, 1890).....                                                                           | 1167     | Expelling, from Sulphates and Bi-sulphates. (P) Johnson. From Kessler. (vi, 1887).....                 | 292       |
| And Selenic Acid, Action of, in Organic Chemistry. (Istrati.) (viii, 1889).....                                                   | 876      | Expulsion of Ammoniacal Compounds from. (Moritz.) (ix, 1890).....                                      | 443       |
| And Sulphurous Acid Fumes, Method and Apparatus for Condensing. (P) Thorp. (ix, 1890).....                                        | 623      | Formation of. (Frieser.) (xiv, 1895).....                                                              | 656       |
| And Sulphurous Acids, Treating Pyrites for Manufacture of. (P) Wurtz. (i, 1882).....                                              | 67       | Formation of, in Burnine Coal-Gas. (Priwoznik.) (xii, 1893).....                                       | 29        |
| Apparatus for Absorption of. (vi, 1887).....                                                                                      | 597      | Freezing Point of:                                                                                     |           |
| Apparatus for Avoiding Loss of Nitric Acid in Manufacture of. (P) Becker and Lasne. (i, 1882).....                                | 189      | (Lunge.) (i, 1882).....                                                                                | 149       |
| Apparatus for Concentration of:                                                                                                   |          | (Pietet.) (xiv, 1895).....                                                                             | 35        |
| (P) Bartsch. (iv, 1885).....                                                                                                      | 500      | Freezing Points of, of Varying Strengths. (Thilo.) (xii, 1893).....                                    | 827       |
| (P) Boulton. From Willett. (iv, 1885).....                                                                                        | 490      | From Brimstone, Cost of. (T.R.) (xi, 1892).....                                                        | 76        |
| (P) Bowen. (xiii, 1884).....                                                                                                      | 251      | From Waste Liquors, Obtaining. (P) Hall. (xi, 1892).....                                               | 613, 613  |
| (P) Bradbury. (xiii, 1894).....                                                                                                   | 107      | Furnaces for Concentrating. (P) Negrier. (x, 1891).....                                                | 46        |
| (P) Deplace. (iii, 1884).....                                                                                                     | 1059     | Hydrocarbons Insoluble in. (Armstrong and Miller.) (v, 1886).....                                      | 374       |
| (P) Dyson. (xiii, 1894).....                                                                                                      | 490      | In Aluminium Sulphate, Detection of. (Hager.) (v, 1886).....                                           | 617       |
| (P) Heraeus. (x, 1891).....                                                                                                       | 491      | In Aluminium Sulphate, Detection of Free. (Miller.) (iii, 1884).....                                   | 258       |
| (P) Jensen. From Kux. (iv, 1885).....                                                                                             | 491      | In Aluminium Sulphate, Determination of Free. (Beilstein and Grosset.) (ix, 1890).....                 | 416       |
| (P) Kalbilleish. (ii, 1883).....                                                                                                  | 42       | In Crude Hydrochloric Acid, Estimation of. (Rurup.) (xiii, 1894).....                                  | 904       |
| (P) Kessler. (xi, 1892).....                                                                                                      | 434      | In Dresden. (T.R.) (vii, 1888).....                                                                    | 701       |
| (P) Lake. From Hannelotte. (xii, 1893).....                                                                                       | 43       | In Germany. (T.R.) (xii, 1893, 963; xiii, 1894).....                                                   | 1111      |

## Manufacture of Anhydrous, in France. (ix, 1890) .....

## Manufacture of, at Moldova. (v, 1886) .....

## Manufacture of, during 1891. (Schertel.) (xi, 1892) .....

## Manuf. of, from Alkali Waste. (P) Hanson. (vii, 1885) .....

## Manufacture of, from Copper and Iron Pyrites. (P) Brin. (vi, 1887) .....

## Manufacture of, from Potassium Salts. (P) Wise. From The Chemische Fabrikken Buckau. (x, 1891) .....

## Manufacture of, from Proto-Sulphate of Iron. (P) D'Andria. (xiii, 1891) .....

## Manufacture of, from Acid Waste. (P) Starek. (ix, 1890) .....

## Manufacture of, in America. (Lunge.) (iii, 1884, 519; (xiii, 1894) .....

## Manufacture of, in Italy. (T.R.) (xiv, 1895) .....

## Manufacture of, in New Zealand. (i, 1882) .....

## Manufacture of, in United States. (Martiny.) (iv, 1885) .....

## Manufacture, Recent Progress in. (T.R.) (ix, 1890) .....

## Manufactures, Syndicate of the Rheinisch Westphalian. (T.R.) (vi, 1887) .....

## Nessler's Method of Concentrating. (xi, 1892) .....

## Nitrogen Compounds in, Detection of. (Lunge.) (vi, 1887) .....

## Oxidation of Copper in presence of Dilute. (Traube.) (iv, 1885) .....

## Permissible Amount of, in Claret. (i, 1882) .....

## Pickle, Treatment of. (P) Dan. (ix, 1890) .....

## Preparation of Anhydrous. (P) Rath. (iii, 1884) .....

## Prep. of, from Gypsum. (Scheurer-Kestner.) (iv, 1885) .....

## Process, Suggestions for Impt. of. (Bole.) (ix, 1890) .....

## Process, Theories of the: (Hamburg.) (viii, 1889) .....

## (Lunge.) (vii, 1888) .....

## (Potter.) (xii, 1893) .....

## (Raschig.) (vii, 1888) .....

## Production of Concentrated, by Electrolysis. (P) Wacker. (xv, 1895) .....

## Products of Concentration of Acetone with Concentrated. (Omdorff and Young.) (xii, 1893) .....

## Purification of: (P) Menzies. (iii, 1884) .....

## (P) Teed. (vii, 1888) .....

## (P) Thompson. From Thomson and Kemp. (iv, 1885) .....

## (Tjaden-Mollermann.) (i, 1882) .....

## Purification of, for Accumulators. (Kusel.) (xi, 1892) .....

## Quantitative Determination of. (Ziegler.) (i, 1882) .....

## Reactions of Vanilic, on Glucosides and Alkaloids. (Kundrat.) (viii, 1889) .....

## Recovery of, from Lyes. (P) Grahowski. (xii, 1893) .....

## Recovery of Nitrous Compounds in Manufacture of. (P) Societ  des Produits Chimiques de Javel. (iv, 1885) .....

## Rectifying. (P) Scott. (xiv, 1895) .....

## Red Colouring of. (Norrenberg.) (ix, 1890) .....

## Reducing Action of Coke on Nitric Acid dissolved in. (Lunge.) (iv, 1885) .....

## Results Obtained in Manufacture of. (Hepworth.) (iii, 1884) .....

## Retorts for Restoring Spent. (Roppold and Leeth.) (i, 1882) .....

## Selenium in. (Davis.) (ii, 1883) .....

## Solubility of Nitric Oxide in. (Lunge.) (iv, 1885) .....

## Solution, Reduction of Nitrobenzene in. (Noyes and Clement.) (xii, 1895) .....

## Sorcl's Paper on, Report on. (Wass.) (ix, 1890) .....

## Source of Error in Determin. of. (Von Meyer.) (ix, 1890) .....

## Specific Gravity of. (Lunge and Naef.) (ii, 1885) .....

## Specific Gravity of, Determinations of. (Lunge and Isler.) (ix, 1890) .....

## Specific Gravity of, Empirical Method of Determining. (Hager.) (ii, 1885) .....

## Specific Gravity Tables for. (i, 1882) .....

## (Lunge.) (ix, 1890) .....

## Specific Heat of of Various Strengths. (Bode.) (viii, 1889) .....

## Table of Specific Gravities of Strong. (Richmond.) (ix, 1890) .....

## Test for Fusel Oil Unstable. (Glascapp.) (xiv, 1895) .....

## Testing Aluminium Sulphate for. (Bayer.) (vi, 1887) .....

## Testing Hydrochloric Acid for. (Lunge.) (i, 1882) .....

## Tetrahydrate, Isolation of a. (Pickering.) (ix, 1890) .....

## Tower. (P) Nichols and Herreshoff. (v, 1885) .....

Sulphuric Acid—*cont.*

| Sulphurous Acid: Absorption and Utilisation of. (Hasenclever.) (i, 1882) .....                                                           | 502, 502 |
| Absorption of. (P) Lyte. (i, 1882) .....                                                                                                 | 321      |
| Action of Carbon on. (Scheurer-Kestner.) (xi, 1892) .....                                                                                | 748      |
| Action of, on Alkaline Hypsulphites. (Villiers.) (viii, 1889) .....                                                                      | 478      |
| Action of, on Flowers of Sulphur. (Colefax.) (xi, 1892) .....                                                                            | 36       |
| Action of, on Metals. (Uhl.) (ix, 1890) .....                                                                                            | 970      |
| Action of, on Nitrous Acid. (Raschig.) (vi, 1887) .....                                                                                  | 819      |
| Action of, on Oleic and Eradic Acid. (Saytzeff.) (xiii, 1894) .....                                                                      | 1208     |
| Alteration of, in Wines. (Chuard and Jaccard.) (xiii, 1894) .....                                                                        | 969      |
| And Beer-Brewing. (i, 1882) .....                                                                                                        | 115      |
| And Iodometry. (Vellhard.) (vi, 1887) .....                                                                                              | 839      |
| And its Salts, Purification of. (P) Meikle. (iv, 1885) .....                                                                             | 345      |
| And its Salts, Titration of. (Lunge.) (ii, 1883) .....                                                                                   | 513      |
| Apparatus for Absorption of. (vi, 1887) .....                                                                                            | 597      |
| Apparatus for Extracting, from Pyrites. (P) Henderson. From Lebois. (iv, 1885) .....                                                     | 497      |
| Apparatus for Manufacture of. (P) Allison. From Nat. Chem. Machine Co. (iii, 1884) .....                                                 | 107      |
| Apparatus for Producing, from Sulphuretted Hydrogen. (P) Simpson and Parnell. (vi, 1887) .....                                           | 729      |
| Apparatus for Producing Solutions of. (P) Horsley and Wilson. (x, 1891) .....                                                            | 543      |
| Apparatus for Recovering, from Paper Manufacture. (P) Kellner. (x, 1891) .....                                                           | 723      |
| Apparatus for Treatment of Wine with. (P) Nessler. (iv, 1885) .....                                                                      | 462      |
| As a Bleaching Agent. (Moyret.) (i, 1882) .....                                                                                          | 360      |
| Contained in Wines. (Seifert.) (xii, 1893) .....                                                                                         | 854      |
| Dehydration of. (P) Pietet. (ii, 1883) .....                                                                                             | 11       |
| Determination of. (Barcz.) (v, 1886) .....                                                                                               | 547      |
| Effect produced by, on Atmosphere of Towus. (Witz.) (iv, 1882) .....                                                                     | 455, 462 |
| Employment of, in Maltng. (Kukla.) (xii, 1891) .....                                                                                     | 968      |
| Examination of Raw Sugar for. (vi, 1887) .....                                                                                           | 591      |
| Extracting Fats and Oils by. (P) Grills and Schröder. (ix, 1890) .....                                                                   | 600      |
| Extraction of, from Fumes of Furnaces. (P) Brydges. From Hausch and Schröder. (iii, 1884) .....                                          | 107      |
| For Disinfecting. (P) Hanlon. (viii, 1889) .....                                                                                         | 131      |
| From Decomposed Iron Sulphate. (P) Terrell. (ii, 1884) .....                                                                             | 414      |
| From Manufacture of Zinc Sulphide. (P) Johnson. From Macfarlane. (iv, 1885) .....                                                        | 536      |
| Gas, Production of. (P) Aldie. (vi, 1887) .....                                                                                          | 41       |
| Gas, Utilisation of. (P) Abel. From Precht. (i, 1882) .....                                                                              | 140      |
| In Beer. (Meifer.) (viii, 1889) .....                                                                                                    | 975      |
| In its Compounds, Estimation of. (Giles and Shearer.) (iii, 1884) .....                                                                  | 197      |
| In Preserved Foods. (Bayer.) (ix, 1890) .....                                                                                            | 404      |

| Tree, Fat and Grease of the Chinese. (iii, 1884)                                   | 181     |
| Valuation of. (Wolfbauer.) (xiii, 1894)                                            | 181     |
| Vegetable, and White Wax in China. (T.R.) (vii, 1888)                              | 598     |
| Tallows and Substitutes, Rapid Methods for Testing. (Tafer.) (ix, 1890)            | 218     |
| Comparing Solidifying Points of. (Finkener.) (ix, 1890)                            | 1071    |
| Tamacoare, Balsam of. (Pfaff.) (xiv, 1895)                                         | 382     |
| Tamar, Arsenic Works on the. (Gould.) (xii, 1893)                                  | 692     |
| Tamarinds, Alcohol from, in New Caledonia. (T.R.) (viii, 1889)                     | 430     |
| Tan, Apparatus for Burning. (P) Brown. (x, 1891)                                   | 239     |
| Bark, Preparation of, for Transportation. (P) Sherman. (i, 1882)                   | 510     |
| Liquors, Analysis of Acid. (Passler.) (xiv, 1895)                                  | 316     |
| Paper-making from. (Kinzevett.) (i, 1882)                                          | 80      |
| Substances, Some New South Wales. (Maiden.) (vii, 1888)                            | 38      |
| Tanghinin and Digitalin. (Arnaud.) (ix, 1890)                                      | 324     |
| Extracted from <i>Tandhinia Venerifera</i> of Madagascar. (Arnaud.) (viii, 1889)   | 1008    |
| Tanziers, Commercial Museum at. (T.R.) (vii, 1888)                                 | 597     |
| Tank Furnaces for Manuf. of Glass. (P) Thomas. (xi, 1892)                          | 1007    |
| Liquors, Purification of. (P) Chance. (v, 1886)                                    | 325     |
| Rendering. (P) Spiegel. (ii, 1883)                                                 | 161     |
| Waters, Conversion of, into Fertilisers. (P) van Ruymbroek. (v, 1886)              | 496     |
| Tanks, Apparatus for Removing Deposits from Settling. (P) Corbett. (xiv, 1895)     | 1058    |
| Conductors for Electrolytic Decomposing. (P) Leith and others. (xiv, 1895)         | 1048    |
| Electrodes of Electrolytic Converting. (P) Tasker and Jones. (v, 1886)             | 172     |
| For Electrical Decomposition of Chlorides. (P) Richardson. (xiii, 1894)            | 646     |
| For Electrolysis. (P) Elmore. (xii, 1893)                                          | 698     |
| For Hydrochloric Acid. (P) Owens. (xii, 1893)                                      | 1030    |
| For Precipitation of Sewage:                                                       |         |
| (P) (i, 1882)                                                                      | 335     |
| (P) Candy. (xiv, 1895)                                                             | 56, 674 |
| (P) Ives. (xiii, 1894)                                                             | 852     |
| For Purification of Sewage. (P) Ives and Bristow. (xii, 1893)                      | 778     |
| For Storage of Compressed Air, Gas, and Volatile Liquids. (P) Timmis. (xiii, 1894) | 788     |
| For Subsidence of Sewage Sludge. (P) Lockwood. (xiii, 1894)                        | 970     |
| Manufacture of Glass. (P) Armstrong. (xi, 1892)                                    | 605     |
| Manufacture of Lead. (P) Davies. (ix, 1890)                                        | 952     |
| Overflow Arms of Precipitating. (P) Ives. (xiv, 1895)                              | 177     |
| Regulating Discharge of Liquids from. (P) Strype. (xiii, 1894)                     | 1180    |
| Safety Arrangements for Oil Storage. (P) Thwaite. (xii, 1893)                      | 591     |
| Screen-bottom for Filter. (P) Kroger. (vi, 1887)                                   | 642     |
| Tanneries, Canadian. (T.R.) (xi, 1892)                                             | 554     |
| Purifying Waste from. (P) Calvert and Chaffer. (x, 1891)                           | 36      |
| Tannic Acid:                                                                       |         |
| (Bottinger.) (ix, 1890)                                                            | 955     |
| A New Reaction of. (Saul.) (vi, 1887)                                              | 151     |
| Absorbed by Cotton, Amounts of. (Knecht and Kershaw.) (xi, 1892)                   | 129     |
| Behaviour of, to Various Reagents. (Etti.) (iii, 1884)                             | 644     |
| Bottinger's New Reaction for. (Smith.) (ix, 1890)                                  | 450     |
| Clarifying Sugar Solutions with. (P) Heffter. (vii, 1888)                          | 446     |
| Compounds of Soluble Albumen with. (Bottinger.) (vii, 1888)                        | 331     |
| Conversion of, into Benzoic Acid. (Guiznet.) (xi, 1892)                            | 261     |
| Determination of. (Gawalowski.) (ii, 1883)                                         | 163     |
| Dyeing with Substances containing. (P) Grundage and Steel. (iv, 1885)              | 455     |
| Estimation of:                                                                     |         |
| (Drenper.) (xii, 1893)                                                             | 412     |
| (Siniguel.) (i, 1882)                                                              | 459     |

| Extracting Volatile Matters from Vegetable. (P) Haddan. From Gouts and Marc. (xiv, 1895).....               | 797      |
| "Free Carbon" in Coal-. (Köhler.) (viii, 1889).....                                                         | 40       |
| From Blast Furnaces and Gas Producers, Treatment of. (P) Bell. (iv, 1885).....                              | 531      |
| From Blast Furnaces, Examination of. (Watson Smith.) (ii, 1883), 495, 496, 500; (iii, 1884).....            | 64       |
| From Coke-Ovens, Treatment of. (P) Bell. (iv, 1885).....                                                    | 337      |
| From Fuel, Process and Apparatus for Obtaining. (P) Mond. (xiii, 1894).....                                 | 938      |
| From Gas, App. for Extracting. (P) Lister. (xi, 1892).....                                                  | 511      |
| From Nitrogenous Organic Substances. (P) Thompson. From Kuntze. (xi, 1892).....                             | 511      |
| From Sutherland's Gas Producers, Examination of. (Watson Smith.) (iii, 1884).....                           | 9, 64    |
| From Water-Gas, Anthracene in. (Elliott.) (iv, 1885).....                                                   | 356      |
| Gas and Coke from, Prod. of. (P) Backer. (vii, 1888).....                                                   | 428      |
| Gas from, Manufacture of. (Leybold.) (vii, 1888).....                                                       | 112      |
| Gasification of. (Merkens.) (x, 1891).....                                                                  | 684      |
| German Trade in. (T.R.) (xiii, 1894).....                                                                   | 1113     |
| High-Boiling Phenols in Coal-. (Noelting.) (iii, 1881).....                                                 | 234      |
| Hydrocarbons from, Production of. (vi, 1887).....                                                           | 282      |
| Indene and Cinnamene in Coal-. (Kraemer and Spilker.) (x, 1891).....                                        | 38       |
| Industry during 1890. (x, 1891).....                                                                        | 689      |
| Industry in 1891, The Coal-. (xi, 1892).....                                                                | 736      |
| Industry, Producing Sulphuric Acid from Acid Waste of. (P) Stark. (ix, 1890).....                           | 734      |
| Influence of Distillation Temperature on Quality of. (Wright.) (vii, 1888).....                             | 59       |
| Lutidines of Coal-. (Lunge and Rosenberg.) (vi, 1887).....                                                  | 365      |
| Manuf. of, for Fuel. (P) Lake. From Homay. (viii, 1889).....                                                | 794      |
| Means for Stripping Gas-. (P) Thomas. (vii, 1888).....                                                      | 115      |
| Obtaining Products from. (P) Stringfellow. (xiv, 1895).....                                                 | 24       |
| Of Bark of Populus Tremula. (Pharmakofsky.) (xiii, 1894).....                                               | 794      |
| Of Pinus Maritima. (Reinard.) (xiii, 1894).....                                                             | 1188     |
| Oils, Examination of Phenols from Jameson Coke-Oven. (Watson Smith.) (ii, 1883), 495, 501; (iii, 1884)..... | 64       |
| Oils, Extraction of Phenol from Coal-. (P) Wischin. (i, 1882).....                                          | 63       |
| Oils, Treatment of, for Wood-Preserving Paints. (P) Avenarius. (vii, 1888).....                             | 403      |
| Oils, Wood Preserving Experiments with. (Boulton.) (iii, 1884).....                                         | 623      |
| Paraffin and Bitumen in Brown-Coal. (von Boyen.) (x, 1891).....                                             | 454, 689 |
| Phenol and Pyridine in Brown Coal, Occurrence of. (Rosenthal.) (ix, 1890).....                              | 926      |
| Phenol Constituents of Blast Furnace. (Watson Smith, Coutts, and Brothers.) (iv, 1885).....                 | 738      |
| Phenol of Birchwood. (Pfeenger.) (x, 1891).....                                                             | 354      |
| Phenols in Coal, Presence of High-Boiling. (Schulze.) (iv, 1885).....                                       | 353      |
| Pine. (Remard.) (viii, 1894), 1188; (xiv, 1895).....                                                        | 474      |
| Pitch, &c., Hardening. (P) Clark. From Wirth. (v, 1886).....                                                | 103      |
| Preparation of. (Bruck.) (iii, 1884).....                                                                   | 510      |
| Preparations, Analysis of Coal-. (Helbing and Passmore.) (xi, 1892).....                                    | 848      |

| Tarrazon, Essence of.                                                 | (Grimaux.) (xiii, 1894).....                               |
| Tartar, Adulteration of.                                              | (Zurek.) (iv, 1885).....                                   |
| Analysis of Crude.                                                    | (Phillips and Fresenius.) (x, 1891).....                   |
| Cream of, Manufacture of.                                             | (P) Wirth. (iv, 1885).....                                 |
| Determination of.                                                     | (Gans.) (ix, 1890).....                                    |
| Determination of, in Wines.                                           | (Schneider.) (ix, 1890).....                               |
| Emetic, Adulteration of.                                              | (Schmid.) (iii, 1884).....                                 |
| Emetic, Amount of, Required to Fix the Tannic Acid Mordant on Cotton. | (Falke.) (xii, 1893).....                                  |
| Emetic and Antimony Oxalate as Mordants.                              | (Hirzel.) (ix, 1885).....                                  |
| Emetic, Antimony Salt as a Substitute for.                            | (Paterson.) (viii, 1889).....                              |
| Emetic, Examination of.                                               | (Williams.) (v, 1886).....                                 |
| Emetic, Fixing Aniline Colours with.                                  | (Prud'homme.) (vii, 1888).....                             |
| Emetic Resist for Silk.                                               | (Koechlin.) (xii, 1891).....                               |
| Emetic Solutions, Preserving Standard.                                | (Müller.) (v, 1886).....                                   |
| Emetic Substitute, Potassio-Antimony Oxalate as.                      | (iv, 1885).....                                            |
| Emetic, Thymol as Preservative for.                                   | (Gerland.) (x, 1891).....                                  |
| Emetic, Valuation of.                                                 | (Hart.) (iii, 1884).....                                   |
| In Sweet Wines, Estimation of.                                        | (Ackermann.) (xii, 1893).....                              |
| In Wines, Determination of.                                           | (Kaiser.) (i, 1882).....                                   |
| Industry of Italy.                                                    | (Kammer.) (iv, 1885).....                                  |
| Materials at Barletta.                                                | (T.R.) (vii, 1888).....                                    |
| Preparation of, from Lees.                                            | (P) Erekmann. (i, 1882).....                               |
| Tartaric Acid:                                                        |                                                            |
| (Dehuzac.)                                                            | (xii, 1893).....                                           |
| A Preventive of Development of Sarcina.                               | (Lindner.) (xiv, 1895).....                                |
| Analysing Raw Material for.                                           | (viii, 1889).....                                          |
| Analysis of Raw Materials containing.                                 | (Goldenberg.) (vii, 1888).....                             |
| Analysis of Substances containing.                                    | (Lorenz.) (vii, 1888).....                                 |
| And Stannous Chloride.                                                | (Liechti and Schützler.) (v, 1886).....                    |
| Change of Rotation of, in Mixed Solutions.                            | (Pfeibram.) (viii, 1889).....                              |
| Decomp. of, by Sunlight.                                              | (Seekamp.) (xiii, 1891).....                               |
| Determination of:                                                     |                                                            |
| (Gans.)                                                               | (ix, 1890).....                                            |
| (Toth.)                                                               | (ix, 1890).....                                            |
| Determ. of, by Precipitation.                                         | (Grosjean.) (ii, 1883).....                                |
| Determinations, Cause of Error in.                                    | (Lampert and Co.) (ix, 1890).....                          |
| Effect of, on Brewery Yeast.                                          | (Hansen.) (xi, 1892).....                                  |
| Estimation of, in Products of Manufacture.                            | (Telbisz.) (ix, 1890).....                                 |
| Examination of Citric Acid for.                                       | (Pusch.) (iv, 1885).....                                   |
| Formation of Inactive.                                                | (Doehner.) (x, 1891).....                                  |
| German Tar in.                                                        | (T.R.) (xii, 1891).....                                    |

| Digester to replace Sealed, in Laboratory Work. (Freys and Noelting.) (xiv, 1895).....                  | 769    |
| Flow of Water, Petroleum, and Mineral Oil through. (Merzving.) (xi, 1892).....                          | 274    |
| For Containing Carbonic Acid Gas. (P) Rylands. (xi, 1892).....                                          | 686    |
| For Heating, &c. Apparatus. (P) Thompson. From                                                          |        |
| Dumas. (xiii, 1894).....                                                                                | 715    |
| For Heating Liquids. (P) Goldthorp. (xiii, 1894).....                                                   | 929    |
| For Heating, Vaporising, and Refrigerating. (P) Dumas. (xiii, 1894).....                                | 930    |
| For Immersing Hydrometers. (P) Fletcher. (xi, 1892).....                                                | 635    |
| For Measuring Gases, Graduation of. (Berthelot.) (vii, 1888).....                                       | 645    |
| For Purifying Molten Glass. (P) Epstein. (xi, 1892).....                                                | 241    |
| Galvanising Metal. (P) Thomas and Hillman. (x, 1891).....                                               | 261    |
| Gas in Iron, rolled by Mannesmann Process. (Finkener.) (viii, 1889).....                                | 308    |
| Gas Reduction. (Lunge.) (ix, 1890).....                                                                 | 893    |
| Glass. (P) Hicks. (v, 1886).....                                                                        | 652    |
| Glaze for Earthenware. (x, 1891).....                                                                   | 465    |
| Hollow Perforated, for Dyeing, &c. (P) Lippitt. (viii, 1889).....                                       | 282    |
| Implement for Cutting Glass. (P) Hunt. (x, 1891).....                                                   | 548    |
| Injection, for Machines for Dyeing Yarn. (P) Graemiger and others. (x, 1891).....                       | 44     |
| Jacketed Glass. (P) Seume. (xii, 1893).....                                                             | 603    |
| Lined with Glass, Couplings for. (P) Rylands and Morant. (xi, 1892).....                                | 162    |
| Lining Metallic, with Glass. (P) Rylands and Husselbeer. (xi, 1892).....                                | 818    |
| Making Parchmentised Fibre. (P) Frist and Ruper. (xi, 1892).....                                        | 1026   |
| Manufacture of, by Electrolysis. (P) Elmore. (xii, 1893).....                                           | 525    |
| Manufacture of Glass:                                                                                   |        |
| (P) Rylands. (x, 1891).....                                                                             | 46, 46 |
| (P) Rylands and Husselbeer. (x, 1891).....                                                              | 643    |
| Metallic Sealed-. (Schiff.) (ix, 1890).....                                                             | 1152   |
| Of Covered Glass. (P) Browne. From Kastner. (xiii, 1894).....                                           | 949    |
| Of Indiarubber, Making Coloured Stripes in. (P) German India-rubber and Guttapercha Co. (ii, 1883)..... | 186    |
| Subjected to High Temperatures, Manufacture of. (P) Fould and Genereau. (vi, 1887).....                 | 43     |
| Tubing and Cord of Indiarubber, Apparatus for Making. (P) Reddie. From Royle. (v, 1886).....            | 103    |
| Fittings for Glass-lined. (P) Rylands and others. (ix, 1890).....                                       | 725    |
| Flexible:                                                                                               |        |
| (Almond.) (x, 1891).....                                                                                | 35     |
| (P) Harris. (iii, 1884).....                                                                            | 615    |
| Glass-lined. (P) Rylands and Morant. (x, 1891).....                                                     | 684    |
| Tulipin: an Alkaloid. (Nicoit.) (vi, 1887).....                                                         | 381    |
| Tun, Construction of Separating. (P) Schaffhaus. (i, 1882).....                                         | 378    |
| Tungsten Alloys, Manufacture of. (P) Martino. (iii, 1884).....                                          | 180    |
| Analysis of. (Ziegler.) (ix, 1890).....                                                                 | 216    |

| Apparatus for Charging Gases with. (P) Reichling. (viii, 1889).....                                                        | 830  |
| Apparatus for Condensation and Purification of. (P) Theisen. (xi, 1892).....                                               | 668  |
| Apparatus for Condensing:                                                                                                  |      |
| (P) Henneberg. (xii, 1894).....                                                                                            | 713  |
| (P) Newton. From Hart. (xiii, 1894).....                                                                                   | 1197 |
| (P) Popper. (ix, 1890).....                                                                                                | 168  |
| (P) Schwager. (x, 1891).....                                                                                               | 449  |
| (P) Steinmüller. (iv, 1885).....                                                                                           | 737  |
| (P) Thompson. From Mathieu. (iv, 1885).....                                                                                | 114  |
| Apparatus for Condensing Metallic. (P) Gratzner and Koehler. (ix, 1890).....                                               | 949  |
| Apparatus for Cooling, &c. (P) Boulton. From Fischer. (vii, 1888).....                                                     | 554  |
| Apparatus for Cooling or Condensing. (P) Schmidt. (viii, 1889).....                                                        | 271  |
| Apparatus for Ejecting or Withdrawing. (P) Edwards. From Köhmann. (xi, 1892).....                                          | 422  |
| Apparatus for Generating and Burning. (P) Raquetin. (xii, 1893).....                                                       | 136  |
| Apparatus for Generating and Hydrogenating. (P) Clark. From Maynard. (iv, 1883).....                                       | 213  |
| Apparatus for Mixing and Burning. (P) Tyler and De Vesian. (xiv, 1895).....                                                | 793  |
| Apparatus for Removing and Purifying Noxious. (P) Smith. (ix, 1890).....                                                   | 882  |
| Apparatus for Separating, from Liquids. (P) Murrie. (v, 1886).....                                                         | 468  |
| Apparatus for Separating Liquids, or Solids from. (P) Jones. (x, 1891).....                                                | 240  |
| Apparatus for Treating Noxious. (P) Makinson. (xi, 1892).....                                                              | 704  |
| Apparatus for Treating Textiles with. (P) Mather. (viii, 1889).....                                                        | 460  |
| Colours and Spectra of Incandescent Metallic. (Dudley.) (xi, 1892).....                                                    | 924  |
| Condensing, and Apparatus therefor. (P) Gamgee. (x, 1891).....                                                             | 823  |
| Containing Fluorine, Removal of, in Manure Works. (x, 1891).....                                                           | 558  |
| Dehydration of. (P) Mather. (xii, 1893).....                                                                               | 762  |
| Effect of Noxious, on Vegetation. (Fricke.) (vi, 1887).....                                                                | 733  |
| Evolved in Manufacture of India-rubber Goods, Apparatus for Condensing. (P) Burghardt. (iii, 1884).....                    | 157  |
| Hydrocarbon, Determination of. (Hempel and Dennis.) (x, 1891).....                                                         | 578  |
| Hydrochloric Acid in Chimney. (Davis.) (i, 1882).....                                                                      | 214  |
| Inflammable, Detecting and Measuring. (P) Tilghmann. (xii, 1894).....                                                      | 1052 |
| Lawrence Cooling Apparatus for Spirituous. (P) Thiesen. (ii, 1883).....                                                    | 294  |
| Of Formaldehyde, Antiseptic Properties of. (Trillat.) (xiv, 1895).....                                                     | 380  |
| Of Manure Works, Noxious. (Morison.) (x, 1891).....                                                                        | 338  |
| Of Oil, Apparatus for Burning. (P) Mills. From Seigle-Goujon. (x, 1891).....                                               | 244  |
| Of Solvents, Apparatus for Driving off Heavy. (P) Parent Syndicate Oil Extractor Co., Ltd., and Dombain. (xiii, 1894)..... | 240  |
| Prevention of Emission of, from Chimneys. (P) Cook. (iv, 1885).....                                                        | 363  |
| Pumps for Pumping or Compressing. (P) Murray. (xiii, 1894).....                                                            | 377  |
| Superheater or. (Bidet.) (xiii, 1894).....                                                                                 | 661  |
| Testing Noxious. (Lovett.) (i, 1882).....                                                                                  | 209  |
| <i>See also under Gases.</i>                                                                                               |      |
| Varnish and Pitch Manufacture. (T.R.) (ix, 1890).....                                                                      | 567  |
| And Wax Productions of China. (Gardner.) (x, 1891).....                                                                    | 555  |
| Apparatus for Manufacture of:                                                                                              |      |

|---------------------------------------------------------------|------|
| Manufacture of:                                               |      |
| (P) Clark. From La Comp. Gén. de Chromolith.                  | 418  |
| (ii, 1883)                                                    |      |
| (P) Crane. From Field. (vii, 1888)                            | 443  |
| (P) Hartley and Blenkinsop. (x, 1891)                         | 263  |
| (P) Piffard. (x, 1891)                                        | 557  |
| (P) Taylor. (xi, 1892)                                        | 620  |
| Manufacture of, from Resin-Acid Esters. (P) Beck. From        |      |
| Schaal. (ix, 1890)                                            | 631  |
| Materials for Rendering, Fire, Damp, and Weather-Proof.       |      |
| (P) Blane. (iv, 1885)                                         | 536  |
| Oxidised Oils for Manufacturing. (P) Brin. (vi, 1887)         | 443  |
| Preparation of, from Gums. (P) Smith. (xi, 1892)              | 341  |
| Preparation of Rapid Drying. (P) Cruickshank. From            |      |
| Pietzeker. (x, 1891)                                          | 1016 |
| Report on. (ix, 1890)                                         | 1046 |
| Soup, Manufacture of. (Andres.) (ii, 1883)                    | 331  |
| Substitute for Resins in. (P) Schaal. (v, 1886)               | 523  |
| Treatment of. (P) Banner. (vii, 1888)                         | 573  |
| Treatment of Gums for making. (P) Smith. (viii, 1889)         | 553  |
| Treatment of Oils employed in. (P) St. George. (x,            |      |
| 1891)                                                         | 840  |
| Turpentine in, Determination of. (Phillips.) (x, 1891)        | 577  |
| Waterproof, for Paper. (iii, 1884)                            | 529  |
| Varnishing in Colours. (P) Perl. (xiii, 1894)                 | 104  |
| Vaseline:                                                     |      |
| (Engler and Boehm.) (vi, 1887)                                | 371  |
| (Vulpian.) (vi, 1887)                                         | 719  |
| Duty on, in Switzerland. (T.R.) (xiv, 1895)                   | 1077 |
| Examination of, for Fatty Oils. (Crauzel.) (xiv, 1895)        | 316  |
| Liquid, as a Solvent for Hypodermic Injections. (Mouner-      |      |
| Lyons.) (ix, 1887)                                            | 520  |
| New American. (Gerstenberger.) (vi, 1887)                     | 676  |
| Oil, Adulteration of Olive Oil with. (Birl.) (vi, 1887)       | 841  |
| Preparing Benzol, &c., from. (P) Hlawaty and Fried-           |      |
| mann.) (x, 1891)                                              | 455  |
| Production of, from Mineral Oils. (viii, 1889)                | 202  |
| Production of German. (Meyer.) (i, 1882)                      | 97   |
| Production of Russian. (Bick.) (i, 1882)                      | 98   |
| Treating Phylloxera with. (x, 1891)                           | 943  |
| Vaseline. (vii, 1888)                                         | 806  |
| Vat Appliance for Dyeing Unstretched Fabrics. (P) Braun.      |      |
| (iv, 1885)                                                    | 280  |
| Blue, Red Discharge on. (Scheurer.) (iv, 1885)                | 542  |
| Blues, Muriate of Ammonia as a Discharge for. (i, 1882)       | 184  |
| For Dyeing with Indigo. (P) Read, Holloway and Sons,          |      |
| and Bindschadler. (xiii, 1894)                                | 390  |
| -Liquor, Purifying, and Recovering Reagents from. (P)         |      |
| Owen. (v, 1886)                                               | 82   |
| -Liquors, Purification of. (P) Chance. (v, 1886)              | 325  |
| -Liquors, Titrating, Oxidisable Sulphur Compounds in.         |      |
| (Lunge.) (i, 1882)                                            | 202  |
| Perrett's Wine Fermenting. (iv, 1885)                         | 287  |
| Redmezz, for Indigo and Blue-Black. (P) Collin and            |      |
| Benoist. (v, 1885)                                            | 493  |
| Rotating, for Boiling Cellulose. (P) Haddan. From             |      |
| Wernu. (vi, 1887)                                             | 519  |
| -Waste, Treatment of. (P) Kenyon. (iii, 1884)                 | 260  |
| -Wastes, Analysis of. (Chaney.) (vii, 1888)                   | 171  |
| Vats, Dye Tanks, &c., Linings for. (P) Frist. (viii, 1889)    | 511  |
| Dyeing. (P) Dreze. (xii, 1893)                                | 40   |
| For Dyeing Indigo Blues. (P) Grime. (xiii, 1894)              | 633  |
| For Dyeing, Washing, &c. (P) Blair. (viii, 1889)              | 982  |
| Or Coppers for Dyeing. (P) Brierley. (vii, 1888)              | 434  |
| Wooden. (P) Inman. (xiii, 1894)                               | 254  |
| Vegetable and Animal Juices, Hydrogen Peroxide in. (Bokorny.) |      |
| (vii, 1888)                                                   | 394  |
| Black, Manufacture of, and Apparatus therefor. (P) De-        |      |
| Lisle. (viii, 1889)                                           | 558  |
| Cell Membranes, Composition of. (Schulze.) (xi, 1892)         | 49   |
| Development, Influence of Atmospheric Pressure on.            |      |
| (Jaccard.) (xii, 1893)                                        | 740  |
| Extracts, Manufacture of. (P) Morand. (vi, 1887)              | 204  |
| Fats. (Jacobson.) (viii, 1889)                                | 123  |
| Fibre, Estimation of, in Linseed Cake, &c. (Cushter.)         |      |
| (xiv, 1895)                                                   | 1071 |
| Fibres, Dyeing, with Insoluble Azo-Coloured Materials. (P)    |      |
| Dawson. (iv, 1885)                                            | 458  |
| Fibrine, Treatment of. (P) Walter. (viii, 1889)               | 535  |
| Kingdom, Methyl Alcohol in the. (Gutzeit.) (vi, 1887)         | 674  |
| Kingdom, Solid Hydrocarbons in the. (Gutzeit.) (viii,         |      |
| 1889)                                                         | 124  |
| Materials, Apparatus for Extracting Constituents from. (P)    |      |
| Seares, jun. (ix, 1890)                                       | 379  |
| Matter, Apparatus for Desiccating. (P) Ryder. (v, 1886)       | 379  |
| Matter, Apparatus for Extraction of. (P) Tolson. (ii,         |      |
| 1883)                                                         | 476  |
| Matter, Carbonisers for Destruction of. (P) Bellerstein.      |      |
| (x, 1891)                                                     | 918  |
| Matter in Wool or Silk Fabrics, Apparatus for Destroying.     |      |
| (P) Tolson. (iii, 1884)                                       | 443  |
| Matter, Incineration of. (Lechartier.) (ix, 1890)             | 329  |
| Matter, Inflammability of, by Nitric Acid. (Hass.) (iv,       |      |
| 1885)                                                         | 466  |
| Matter, Process and Apparatus for Bleaching. (P) Boul,        |      |
| From Pawlowski. (vii, 1888)                                   | 207  |
| Matters, Electrolytic Treatment of, for Production of         |      |
| Starch. (P) Hermite, Paterson, and Cooper. (ix, 1890)         | 878  |
| Matters, Furnaces for Treat ng. (P) Ogden. (ix, 1887)         | 672  |

| In Butter, Estimation of. (Wibel.) (xii, 1893).....                                                  | 630                        |    |
| In Cane Sugar, Estimation of. (Gunning and Alberda.) (xiv, 1895).....                                | 398                        |    |
| In Iodine, Determination of. (Meincke.) (xii, 1893).....                                             | 550                        |    |
| In Meat Extracts, Determination of. (Stutzer.) (xiv, 1895).....                                      | 897                        |    |
| In Potato Starch, Estimation of. (Saare.) (iii, 1884).....                                           | 527                        |    |
| In Raw Sugars, Estimation of. (Gunning and Alberda.) (xiv, 1895).....                                | 198                        |    |
| In Paraffin Seals, Determination of. (Thomson.) (x, 1891).....                                       | 315                        |    |
| In Soil after Drought, Determ. of. (Reiset.) (xii, 1893).....                                        | 850                        |    |
| In Steam Boilers, Apparatus for Purifying. (P) Sanderson. From O'Brien and Weaver. (viii, 1889)..... | 971                        |    |
| In Superphosphates, Determ. of. (Stoklasa.) (ix, 1890).....                                          | 969                        |    |
| In Syrup and Masses, Estimation of. (Josse.) (xii, 1893).....                                        | 774                        |    |
| Increase of Bacteria in. (Wolffhugel and Riedel.) (vi, 1887).....                                    | 557                        |    |
| Inf. of Ferruginous, in Maltmg. (Kukla.) (xiii, 1894).....                                           | 1080                       |    |
| Influence of Industrial Processes on River. (Caspary.) (iv, 1885).....                               | 749                        |    |
| Influence of Mineral Constituents of, on Worms. (Moritz.) (vi, 1887).....                            | 603                        |    |
| Influence of, on Colour of Beer. (Mierau.) (xiv, 1895).....                                          | 668                        |    |
| Influence of, on Combustion of Carbon Monoxide. (Traube.) (iv, 1885).....                            | 668                        |    |
| Inf. of, on Strength of Paper. (von Lenz.) (xiv, 1895).....                                          | 882                        |    |
| Inf. of Sea, on Portland Cement. (Candlot.) (ix, 1890).....                                          | 735                        |    |
| Influence of Sulphuric Acid on Action of, on Lead. (Carleton-Williams.) (vi, 1887).....              | 111                        |    |
| Iron in, Estimation of. (Bell.) (viii, 1889).....                                                    | 175                        |    |
| Lead in. (Rawson.) (viii, 1889).....                                                                 | 611, 638                   |    |
| Lead Pipes for Conveying:                                                                            |                            |    |
| (Lecoq.) (xiii, 1894).....                                                                           | 547                        |    |
| (Steiner.) (iv, 1885).....                                                                           | 608                        |    |
| Lead Poisoning by. (viii, 1889).....                                                                 | 912                        |    |
| Level Arrangement for Boilers. (P) Lefevre and Renaux. (ii, 1883).....                               | 343                        |    |
| Magnesia in, Rapid Detection of. (Stolla.) (i, 1882).....                                            | 339                        |    |
| Mains, Reason for Corrosion of Untarred. (Weissmann.) (vi, 1889).....                                | 378                        |    |
| Manual Value of Deposit of Urban Refuse. (Fleischerem.) (iv, 1885).....                              | 230                        |    |
| Mark in Boilers, Apparatus for Regulatmg. (P) Grossmann.) (ii, 1883).....                            | 34                         |    |
| Material for Purifying. (P) Gregory and MacDonald. (ix, 1890).....                                   | 43                         |    |
| Material for Treatment of Polluted:                                                                  |                            |    |
| (P) Burghardt. (xii, 1893).....                                                                      | 778, 778                   |    |
| (P) Candy. (x, 1891).....                                                                            | 156                        |    |
| (P) Slater and others. (vi, 1887).....                                                               | 378                        |    |
| (P) Slater and the Native Guano Company. (x, 1891).....                                              | 846                        |    |
| (P) Whalley. (xiii, 1894).....                                                                       | 653                        |    |
| Metals in Drinking, Detection of. (Cooper.) (v, 1886).....                                           | 81                         |    |
| Meter. (P) Jaquet. (ii, 1883).....                                                                   | 162                        |    |
| Meters, Construction of. (P) Stoll. (i, 1882).....                                                   | 369                        |    |
| Micro-Organisms in Brewing, Detection of. (Hansen.) (vii, 1888).....                                 | 387                        |    |
| Micro-Organisms in Drinking. (Gölling.) (v, 1886).....                                               | 514                        |    |
| Mixing Chloroform with. (P) Landon and Wilson. (vi, 1887).....                                       | 382                        |    |
| Müller's Method for Estimating Oxygen in. (Hefelman and Barth.) (ix, 1890).....                      | 109                        |    |
| Neutrality of. (Mylius and Foerster.) (x, 1891).....                                                 | 836                        |    |
| New Spring at Friedrichshall. (T.R.) (xiv, 1895).....                                                | 616                        |    |
| Nitrates in, Error in Determination of. (Bertram.) (x, 1891).....                                    | 951                        |    |
| Nitrates in Natural, Estimates of. (Hooker.) (viii, 1889).....                                       | 138                        |    |
| Nitrates in Potable, Determination of. (Güll.) (xiii, 1894).....                                     | 663, 664; (xiv, 1895)..... | 71 |
| Nitric Acid in Drinking, Determination of, by Schulze-Tiemann's Method. (Spiegel.) (ix, 1890).....   | 896                        |    |
| Nitrites in, Detection of. (Mussel.) (viii, 1889).....                                               | 420                        |    |
| Nitrous Acid in Drinking, Detection of. (Praskaner.) (viii, 1889).....                               | 509                        |    |
| Obtained from Artesian Wells at Mantua. (Bonato.) (xiii, 1894).....                                  | 732                        |    |
| Of Crystallisation of Barium Thiocyanate. (Fehrmann.) (xii, 1893).....                               | 41                         |    |
| Of River Bode, Influence of Drainage from Potash Works on. (Poeke.) (vi, 1887).....                  | 604                        |    |
| Of Rivers, Diminution of Dissolved Organic Matter in. (Young.) (xiii, 1894).....                     | 318                        |    |
| Organic Matter in, Estimating. (Young.) (x, 1891).....                                               | 883                        |    |
| Organic Matter in Potable, Determination of. (Mallet.) (ii, 1883).....                               | 358                        |    |
| Organic Matter in Spring. (Kobrich.) (vi, 1887).....                                                 | 455                        |    |
| Organic Nitrogen in, Estimation of. (Leffmann and Baum.) (viii, 1889).....                           | 480                        |    |

| Containing Arsenic, Purification of. (L'Hôte.) (iv, 1885)                                               | 284  | Hydrate, Separation of. (P) Senier. (vii, 1888)                                                         | 845  |
| Containing Lead, Behaviour of, on Melting. (Kraut.) (v, 1886)                                           | 537  | In Acetic Acid, Presence of. (Hahn.) (ii, 1883)                                                         | 413  |
| Co-operation of Water in Oxidation of. (Traube.) (iv, 1885)                                             | 673  | In Dolomite, Diffusion of. (Jehle.) (ii, 1883)                                                          | 159  |
| Copper Sulphate as an Indicator in Titration of. (Moldenhauer.) (ix, 1890)                              | 108  | In Neutral Solution, Quantitative Determination of. (Lohr.) (ii, 1883)                                  | 428  |
| Corrosion of, in Contact with Brick. (ix, 1890)                                                         | 1037 | In New South Wales. (T.R.) (xii, 1893)                                                                  | 959  |
| Corrosion of, in Contact with Cement. (Segez.) (x, 1891)                                                | 149  | In Ores containing Iron and Manganese, Volumetric Estimation of. (Fahlberg.) (i, 1882)                  | 276  |
| Deposition of Nickel upon. (Meidinger.) (ii, 1883)                                                      | 478  | In Preserved Foods. (Alent.) (xi, 1892)                                                                 | 563  |
| Desilverisation of. (Rossler and Edelmann.) (x, 1891)                                                   | 550  | In the United States. (T.R.) (vii, 1888; 599; (viii, 1889)                                              | 589  |
| Desilverisation of Lead by. (Rossler and Edelmann.) (x, 1891)                                           | 932  | In Zinc-dust, Volumetric Estimation of. (Weil.) (vi, 1887)                                              | 147  |
| Determination of:                                                                                       |      | Industry on the Increase. (T.R.) (viii, 1889)                                                           | 484  |
| (Losekann and Meyer.) (v, 1886)                                                                         | 502  | Lead, and Silver, Separation and Estimation of. (Aubm.) (xi, 1892)                                      | 775  |
| (Moldenhauer.) (x, 1891)                                                                                | 374  | -Lead Ores, Electro-Chlorination of. (vii, 1888)                                                        | 572  |
| (Shiner.) (xiv, 1895)                                                                                   | 510  | -Lead Process, The F. L. Bartlett. (Hawker.) (xiii, 1894)                                               | 41   |
| Estimation of, as Amalgam. (Vortmann.) (x, 1891)                                                        | 1036 | -Lead-Sulphide Ores, Treatment of. (P) Fell. From Emmens Zinc Co. (xiii, 1894)                          | 402  |
| Estimation of, as Pyrophosphate. (Jawein.) (vi, 1887)                                                   | 523  | -Lead Sulphides, Ashcroft Process for Treating. (xiv, 1895)                                             | 774  |
| Estimation of, by Classen's Oxalate Method. (Nass.) (ix, 1890)                                          | 69   | -Lead Sulphides, Treatment of Arseniferous. (Schmabel.) (xi, 1892)                                      | 821  |
| Estimation of, by Ferrie Hydrate. (Minor.) (ix, 1890)                                                   | 109  | Manufacture, Estimation of Cadmium in Products of. (Minor.) (ix, 1890)                                  | 554  |
| Estimation of, in Ores. (xi, 1892)                                                                      | 846  | Muffles, Formation of Cast-Iron in. (Jensch.) (xiii, 1894)                                              | 398  |
| Estimation of, in Pure Zinc Sulphate Solutions. (vi, 1887)                                              | 49   | Nickel Plating of. (Ebermeyer.) (iii, 1884)                                                             | 486  |
| Difficult Solubility of Pure, in Acids. (Weeren.) (x, 1891)                                             | 455  | Obtaining, by Electrolysis:                                                                             |      |
| Distillation of. (Steger.) (v, 1886)                                                                    | 607  | (P) Elmore. (x, 1891)                                                                                   | 146  |
| Dust, Analysis of. (Meyer.) (xiii, 1894)                                                                | 841  | (Lake.) (i, 1882)                                                                                       | 111  |
| Dust of Cillier, Cadmium in. (iii, 1884)                                                                | 523  | (P) Seccall. (ix, 1890)                                                                                 | 520  |
| Dust Reactions. (Schwarz.) (v, 1886)                                                                    | 391  | Obtaining Compounds of, for Pigments. (P) French. (x, 1891)                                             | 1015 |
| Dust, Valuation of:                                                                                     |      | Obtaining, from its Ores. (P) Squire and Currie. (vi, 1887)                                             | 734  |
| (Bach.) (xiii, 1894)                                                                                    | 765  | Obtaining, from Waste Liquors. (xi, 1892)                                                               | 613  |
| (Fräkel.) (xii, 1895)                                                                                   | 65   | Obtaining, from Zinc Oxide. (P) Squire and Currie. (vi, 1887)                                           | 734  |
| (Klemp.) (ix, 1890)                                                                                     | 968  | Ore, Producing Chlorine and Zinc from. (P) Lea and Hammond. (vi, 1887)                                  | 664  |
| Electro-Deposition of:                                                                                  |      | Ores and Residues, Treatment of. (P) Clark. From Costes and others. (xi, 1892)                          | 362  |
| (P) Cowper-Coles and Walker. (xiii, 1894)                                                               | 1067 | Ores, Apparatus for Reduction of. (P) Immaghi. (x, 1891)                                                | 145  |
| (Henthfield and Rawson.) (xiv, 1895)                                                                    | 756  | Ores, Desulphurising. (P) Hart. (xi, 1892)                                                              | 923  |
| (Richter.) (ix, 1895)                                                                                   | 874  | Ores, Electrolytic Treatment of. (Swinburne.) (xi, 1892)                                                | 824  |
| Electrolytic Extraction of:                                                                             |      | Ores, Examination of. (Minor.) (ix, 1890)                                                               | 447  |
| (P) Abel and Lang. From Saxon and Alsace. (xii, 1890)                                                   | 698  | Ores, Method and Apparatus for Reducing. (P) Walsh. (vi, 1887)                                          | 600  |
| (P) Edwards and Lange. (x, 1891)                                                                        | 947  | Ores, Method and Apparatus for Treating. (P) West. (xi, 1892)                                           | 351  |
| (Nahsen.) (ix, 1892)                                                                                    | 355  | Ores, Reduction of. (P) Lake. From Westman. (iv, 1885)                                                  | 678  |
| (P) Siemens Bros. and Co. From Siemens and Halske. (xiv, 1895)                                          | 874  | Ores, Regenerative Gas Furnace for Reduction of. (P) Dor. (xi, 1892)                                    | 615  |
| Electrolytic Separation of Cadmium from. (Smith and Frankel.) (viii, 1889)                              | 639  | Ores, Smelting and Refining. (P) Bennett. (vi, 1887)                                                    | 371  |
| Electrolytic Separation of, from Silver. (Smith and Frankel.) (ix, 1890)                                | 653  | Ores, Treatment of:                                                                                     |      |
| Estimation and Separation of. (Ribban.) (vii, 1888)                                                     | 823  | (P) Glaser. From Erben and Wiester. (iii, 1884)                                                         | 640  |
| Estimation of, according to Donath and Hattensaur. (Blum.) (ix, 1890)                                   | 969  | (P) Hart. (xi, 1892)                                                                                    | 352  |
| Estimation of, in Calamine containing Lead. (Minor.) (ix, 1890)                                         | 972  | (Hart.) (xiv, 1895)                                                                                     | 544  |
| Estimation of, in its Ores. (Coda.) (ix, 1890)                                                          | 968  | (P) MacArthur and Forrest. (vii, 1888)                                                                  | 389  |
| Estimation of, in Presence of Manganese. (Neumann.) (viii, 1889)                                        | 62   | (Meyer.) (xiii, 1894)                                                                                   | 1225 |
|                                                                                                         |      | (P) The Alkaline Reduction Syndicate and Cunningham. (ix, 1890)                                         | 741  |
|                                                                                                         |      | Oxide and Zinc Dust for Assisting Saponification of Fats by Water. (P) Poulain and Michand. (iii, 1884) | 112  |
|                                                                                                         |      | Oxide, Characteristics of. (Brügelmann.) (ix, 1890)                                                     | 766  |

| Treatment of Silver and Gold Ores containing. (P) Penrose. (xii, 1893) .....                                | 522  |
| Use of Iron instead of, for Construction of Voltaic Batteries. (Coleman.) (iv, 1885) .....                  | 725  |
| Volumetric Determination of:                                                                                |      |
| (Donath and Hattensaur.) (ix, 1890) .....                                                                   |      |
| (Mahon.) (i, 1882) .....                                                                                    |      |
| (Voigt.) (viii, 1889) .....                                                                                 |      |
| Volumetric Estimation of:                                                                                   |      |
| (Balling.) (ii, 1883) .....                                                                                 |      |
| (Himman.) (xii, 1893) .....                                                                                 |      |
| (Lescœur.) (xiv, 1895) .....                                                                                |      |
| Volumetric Estimation of Salts of. (Barthe.) (x, 1891) .....                                                |      |
| Waste, Ammonia from. (P) Reineken. (iv, 1885) .....                                                         |      |
| White, German Trade in. (T.R.) (xiii, 1894) .....                                                           |      |
| White Industry in Germany. (T.R.) (ix, 1890) .....                                                          |      |
| White, Production of:                                                                                       |      |
| (P) Cobley. (xii, 1893) .....                                                                               |      |
| (Schnabel.) (i, 1882) .....                                                                                 |      |
| Works, Utilisation of Sulphurous Acid in. (T.R.) (xii, 1893) .....                                          |      |
| World's Production and Consumption of. (T.R.) (xiv, 1895) ..                                                | 9    |
| Zincammonium Compounds, Manuf. and Application of (Wright.) (iii, 1884) .....                               |      |
| Zircon in the United States in 1884. (viii, 1889) .....                                                     |      |
| Zirconia as a Substitute for Zinc for Lighting. (Kochs.) (x, 1891) .....                                    |      |
| Zirconium Salts, Obtaining from Ores. (P) Imray. From MacKean. (ix, 1890) .....                             |      |
| Zinc Reactions, Sensitiveness of, and Use of. (Trey.) (xiv, 1895) .....                                     |      |
| Zsigmondy and Benedikt's Process for Examination of Glycerin. (Sulman and Berry.) (v, 1889) .....           | 177  |
| Zürich, Efficiency of Sand-Filters at. (xi, 1892) .....                                                     | 364  |
| (Bertschinger.) (viii, 1889) .....                                                                          | 998  |
